The Roman War Machine Third Edition:

The Roman War Machine John Peddie,2004 War Elephants John M. Kistler,2007-10-01 Elephants have fought in human armies for more than three thousand years This is the largely forgotten tale of the credit they deserve and the sacrifices they endured *Warfare in the Ancient World* Brian Todd Carey,Joshua B. Allfree,John Cairns,2006-01-19 An interesting study of the development of military organization and strategy across several millennia from Bronze Age Mesopotamia to the last days of Rome The Pegasus Archive *Warfare in the Ancient World* explores how civilizations and cultures made war on the battlefields of the Near East and Europe between the rise of civilization in Mesopotamia in the late fourth millennium BC and the fall of Rome Through an exploration of twenty six selected battles military historian Brian Todd Carey surveys the changing tactical relationships between the four weapon systems heavy and light infantry and heavy and light cavalry focusing on how shock and missile combat evolved from tentative beginnings in the Bronze Age to the highly developed military organization created by the Romans The art of warfare reached a very sophisticated level of development during this three millennia span Commanders fully realized the tactical capabilities of shock and missile combat in large battlefield situations Modern principles of war like the primacy of the offensive mass and economy of force were understood by pre modern generals and applied on battlefields throughout the period Through the use of dozens of multiphase tactical maps this fascinating introduction to the art of war during western civilizations ancient and classical periods pulls together the primary and secondary sources and creates a powerful historical narrative The result is a synthetic work that will be essential reading for students and armchair historians alike An ambitious book that sets out to cover four and a half thousand years of military history from the rise of the first civilizations in the Near East to the fall of the Western Roman Empire

History of War The Nature of War in the Information Age David J. Lonsdale,2004-06-01 There has been a great deal of speculation recently concerning the likely impact of the Information Age on warfare In this vein much of the *Revolution in Military Affairs* RMA literature subscribes to the idea that the Information Age will witness a transformation in the very nature of war In this book David Lonsdale puts that notion to the test Using a range of contexts the book sets out to look at whether the classical Clausewitzian theory of the nature of war will retain its validity in this new age The analysis covers the character of the future battlespace the function of command and the much hyped concept of Strategic Information Warfare Finally the book broadens its perspective to examine the nature of Information Power and its implications for geopolitics Through an assessment of both historical and contemporary case studies including the events following September 11 and the recent war in Iraq the author concludes that although the future will see many changes to the conduct of warfare the nature of war as given theoretical form by Clausewitz will remain essentially unchanged **General Issues in the Study of Medieval Logistics** John Haldon,2006-01-01 Logistics is a central concern for military strategists but the study of logistics in the past entails far more than merely military aspects The study of resources and their production distribution

and consumption in pre modern societies of road networks and communications and of transportation is an essential precondition so that the study of logistics is also the study of pre industrial social economic and spatial organisation This volume presents a series of papers dealing with the methodological technical and historical issues associated with the study of logistics in all its aspects and in particular demonstrates the value of modern computer modelling and of integrating archaeological historical and environmental research techniques and agendas into a common project

The Arts of Leadership Keith Grint,2000-04-13 Leadership is still much discussed studied and sought after even though we now live in supposedly more democratic times with flatter organizations and empowered employees But how can we best understand leadership Are leaders born or made Do they have particular traits or are we all potential leaders Do the requirements for leadership change over time or are there timeless patterns Do traditional approaches help us to pick and develop leaders or are there alternative ways that advance our understanding In this book Keith GrintDSwho has been studying and teaching leadership for over a decadeDSinvestigates the notion of leadership in a series of historical case studies and rich essay portraits of some of the most famous and infamous leaders e g Florence Nightingale Richard Branson Horatio Nelson Martin Luther King Henry Ford etc The scenarios are drawn from right across the spectrum to include business politics society and the military The first part of the book considers four sets of parallel cases where leadership appears to be a major explanation of success and failure The second part takes the four critical issues arising from these parallel cases identity strategic vision organizational tactics and persuasive communication and explores them in detail One main reason we have such difficulty in explaining and enhancing leadership Grint argues is because we often adopt perspectives and models that obscure rather than illuminate the issues involved The reliance upon traditional scientific analysis has not provided the anticipated advances in our understanding because leadership is more fruitfully considered as an art or more exactly an array of arts rather than as a science Grint s rich and meticulously researched profiles combine to reveal these Arts of Leadership

The Construction of the Roman Legionary Fortress at Inchtuthil Elizabeth A. M. Shirley,2000 This volume presents a detailed examination of the resource implications of building a large fortress focusing on evidence from the unique site of Inchtuthil Scotland which was constructed and demolished within a period of only three years AD 83 86

Roman Camps in Wales and the Marches J. L. Davies,Rebecca H. Jones,2006 The Roman army in Britain left a rich archaeological legacy in the form of permanently occupied installations such as legionary fortresses auxiliary forts and frontier works Less well known are those field works built by the army on campaign marching camps or as part of its rigorous training regimes namely practice works This volume presents a detailed study of these lesser known field entrenchments in Wales and the Marches a region which for a generation from the mid first century AD became the focus of operations in southern Britain Thereafter complexes of practice works in the vicinity of permanently occupied military bases illustrate the importance of the region to the training regimes of the provincial army This volume presents a detailed

description of those varied camps recorded in Wales and the Marches in the form of a gazetteer together with plans of all accessible sites thereby complementing those already published for most of England by the RCAHME The camps are discussed against the background of Roman military castramentation and tactics on a wide chronological and geographical front with specific reference to the story of early campaigning in this western region as well as the subsequent garrisoning phase as illustrated by a combination of literary and archaeological evidence Collection Latomus ,2016 **The Saturday Review of Politics, Literature, Science, Art, and Finance** ,1918 **American Revisions and Additions to the Encyclopaedia Britannica** William Harrison De Puy,Encyclopaedia Britannica, Inc,1891 **Bulletin** Salem Public Library,1909 The Literary World ,1895 *The Athenaeum* ,1878 **The Law Times** ,1902 **Engineering** ,1889 **The Author** ,1895 *The Saturday Review of Politics, Literature, Science and Art* ,1878 Bulletin of the Salem Public Library Salem Public Library,1907 Athenaeum and Literary Chronicle ,1878
