The Road to the Stars Iain Nicolson, 1978      **The Stars & Constellations** Royal Hill, 1885      *Agent to the Stars* John Scalzi, 2008-10-28 From New York Times bestseller and Hugo Award winner John Scalzi a gleeful mash up of science fiction and Hollywood satire The space faring Yherajk have come to Earth to meet us and to begin humanity's first interstellar friendship There's just one problem They're hideously ugly and they smell like rotting fish So getting humanity's trust is a challenge The Yherajk need someone who can help them close the deal Enter Thomas Stein who knows something about closing deals He's one of Hollywood's hottest young agents But although Stein may have just concluded the biggest deal of his career it's quite another thing to negotiate for an entire alien race To earn his percentage this time he's going to need all the smarts skills and wits he can muster Other Tor Books The Android's Dream Agent to the Stars Your Hate Mail Will Be Graded Fuzzy Nation Redshirts 1 Lock In 2 Head On The Interdependency Sequence 1 The Collapsing Empire 2 The Consuming Fire Old Man's War Series 1 Old Man's War 2 The Ghost Brigades 3 The Last Colony 4 Zoe's Tale 5 The Human Division 6 The End of All Things At the Publisher's request this title is being sold without Digital Rights Management Software DRM applied      **March to the Stars** David Weber, John Ringo, 2003 Roger Ramius Sergei Alexander Chiang MacClintock has had a really bad year Bad enough to be the spoiled rotten fop of a prince no one wanted or trusted Jacket      **Fishing Guide to the Stars** Kramer Wetzell, 2005-06-01 Romance through the signs 144 combinations covered      *Bringing Life to the Stars* David G. Duemler, 1993 This book attempts to provide an ethical foundation with which to address the question Should we spread life beyond Earth It examines the material conditions of the solar system the limits of consciousness the limits of society and the long term possibilities of sending human life out into the universe The author delineates the ethical criteria of sentient life and considers justifications of space travel for the purpose of human expansion Duemler gives special attention to the utilitarian explanation which concludes that if life did gnyad throughout the solar system or even the galaxy then this would serve to increase the amount of sentient life and if life in the new world is a balanced positive is therefore a positive event Three main issues drawing upon both science and philosophy fall at the center of the discussion supporting evidence not based on questionable dogma nor requiring huge intuitive leaps of faith it must square with natural selection and have biological plausibility and it must have inherent value not requiring underlying conditions for a judgement to pass
