The Triumph of the English Language Richard Poster Jones,1966      The Triumph of the English Language Richard Foster Jones,1974      **The Triumph of the English Language; a Survey of Opinions Concerning the Vernacular from the Introduction of Printing to** Richard Foster Jones,1953      **Between Marx and Coca-Cola** Axel Schildt,Detlef Siegfried,2006 In the 1960s and 70s a new youth consciousness emerged in Western Europe which gave this period its distinct character This volume demonstrates how international developments fused with national traditions producing specific youth cultures that became leading trendsetters of emergent post industrial Western societies      Renaissance Culture and the Everyday Patricia Fumerton,Simon Hunt,2014-06-10 It was not unusual during the Renaissance for cooks to torture animals before slaughtering them in order to render the meat more tender for women to use needlepoint to cover up their misconduct and prove their obedience and for people to cover the walls of their own homes with graffiti Items and activities as familiar as mirrors books horses everyday speech money laundry baskets graffiti embroidery and food preparation look decidedly less familiar when seen through the eyes of Renaissance men and women In Renaissance Culture and the Everyday such scholars as Judith Brown Frances Dolan Richard Helgerson Debora Shuger Don Wayne and Stephanie Jed illuminate the sometimes surprising issues at stake in just such common matters of everyday life during the Renaissance in England and on the Continent Organized around the categories of materiality women and transgression and constantly crossing these categories the book promotes and challenges readers thinking of the everyday While not ignoring the aristocratic it foregrounds the common person the marginal and the domestic even as it presents the unusual details of their existence What results is an expansive variegated and sometimes even contradictory vision in which the strange becomes not alien but a defining mark of everyday life      **Race and U.S. Foreign Policy from Colonial Times Through the Age of Jackson** E. Nathaniel Gates,2021-12-24 First published in 1998 Explores the concept of race The term race which originally denoted genealogical or class identity has in the comparatively brief span of 300 years taken on an entirely new meaning In the wake of the Enlightenment it came to be applied to social groups This ideological transformation coupled with a dogmatic insistence that the groups so designated were natural and not socially created gave birth to the modern notion of races as genetically distinct entities The results of this view were the encoding of race and racial hierarchies in law literature and culture How racialcategories facilitate social control The articles in the series demonstrate that the classification of humans according to selected physical characteristics was an arbitrary decision that was not based on valid scientific method They also examine the impact of colonialism on the propagation of the concept and note that racial categorization is a powerful social force that is often used to promote the interests of dominant social groups Finally the collection surveys how laws based on race have been enacted around the world to deny power to minority groups A multidisciplinaryresource This collection of outstanding articles brings multiple perspectives to bear on race theory and draws on a wider ranger of

periodicals than even the largest library usually holds Even if all the articles were available on campus chances are that a student would have to track them down in several libraries and microfilm collections Providing of course that no journals were reserved for graduate students out for binding or simply missing This convenient set saves students substantial time and effort by making available all the key articles in one reliable source *The Golden Mean of Languages* Alisa van de Haar,2019-09-02 In *The Golden Mean of Languages* Alisa van de Haar sheds new light on the debates regarding the form and status of the vernacular in the early modern Low Countries where both Dutch and French were local tongues The fascination with the history grammar spelling and vocabulary of Dutch and French has been studied mainly from monolingual perspectives tracing the development towards modern Dutch or French Van de Haar shows that the discussions on these languages were rooted in multilingual environments in particular in French schools Calvinist churches printing houses and chambers of rhetoric The proposals that were formulated there to forge Dutch and French into useful forms were not directed solely at uniformization but were much more diverse *Europe's Languages on England's Stages, 1590-1620* Marianne Montgomery,2016-04-22 Though representations of alien languages on the early modern stage have usually been read as mocking xenophobic or at the very least extremely anxious listening closely to these languages in the drama of Shakespeare and his contemporaries Marianne Montgomery discerns a more complex reality She argues instead that the drama of the early modern period holds up linguistic variety as a source of strength and offers playgoers a cosmopolitan engagement with the foreign that while still sometimes anxious complicates easy national distinctions The study surveys six of the European languages heard on London s commercial stages during the three decades between 1590 and 1620 Welsh French Dutch Spanish Irish and Latin and the distinct sets of cultural issues that they made audible Exploring issues of culture and performance raised by representations of European languages on the stage this book joins and advances two critical conversations on early modern drama It both works to recover English relations with alien cultures in the period by looking at how such encounters were staged and treats sound and performance as essential to understanding what Europe s languages meant in the theater *Europe s Languages on England s Stages 1590 1620* contributes to our emerging sense of how local identities and global knowledge in early modern England were necessarily shaped by encounters with nearby lands particularly encounters staged for aural consumption *Chancery Practice* John Greene Henderson,1904 *Moffatt's history readers* Moffatt and Paige,1883 *House of Commons Debates, Official Report* Canada. Parliament. House of Commons,1898 **Official Reports of the Debates of the House of Commons of the Dominion of Canada** Canada. Parliament.
