Washingtons America:

George Washington and the American Military Tradition Don Higginbotham, 1987-10-01 In George Washington and the American Military Tradition Don Higginbotham investigates the interplay of militiaman and professional soldier of soldier and legislator that shaped George Washington's military career and ultimately fostered the victory that brought independence to our nation Higginbotham then explores the legacy of Washington's success revealing that the crucial blending of civil and military concerns characteristic of the Revolution has been variously regarded and only seldom repeated by later generations of American soldiers Washington's training between 1753 and 1755 included frontier command in the Virginia militia adjunct service to the British regulars during the French and Indian War and increasing civil service in the Virginia House of Burgesses and Continental Congress The result of this combination of pursuits was Washington's concern for the citizen behind the soldier his appreciation of both frontier tactics and professional discipline and his sensitivity to political conflict and consensus in thirteen colonies in forming a new united nation When in 1775 Washington accepted command of the Continental Army from the Continental Congress he possessed political and military experience that enabled him by 1783 to translate the Declaration of Independence into victory over the British Yet Higginbotham notes the legacy of Washington's success has sometimes been overlooked by generals concerned with professional training and a permanent military establishment and therefore apt to revere foreign heroes such as Jomini Napoleon and Bismarck more than Washington Other leaders most notably the World War II chief of staff George Marshall have recognized and implemented Washington's unique understanding of civil and military coordination In times almost wholly dominated by a military agenda Washington's and Marshall's steady subordination of soldier to citizen of strategy to legislation recalls the careful consensus of thirteen colonies in 1776

Marlborough's America Stephen Saunders Webb, 2012-01-08 Scholars of British America generally conclude that the early eighteenth century Anglo American empire was commercial in economics liberal in politics and parochial in policy somnambulant in an era of salutary neglect but Stephen Saunders Webb here demonstrates that the American provinces under the spur of war became capitalist coercive and aggressive owing to the vigorous leadership of career army officers trained and nominated to American

government by the captain general of the allied armies the first duke of Marlborough and that his influence and that of his legates prevailed through the entire century in America Webb's work follows the duke whom an eloquent enemy described as the greatest statesman and the greatest general that this country or any other country has produced his staff and soldiers through the ten campaigns which by defanging France made the union with Scotland possible and made Great Britain preeminent in the Atlantic world Then Webb demonstrates that the duke's legates transformed American colonies into provinces of empire Marlborough's America fifty years in the making is the fourth volume of *The Governors General* *The Greenwood Encyclopedia of Daily Life in America* Randall M. lacked the funds the political will and the administrative capacity to make their hopes for the capital a reality Across much of the next three decades Thomas Jefferson and other Jeffersonian politicians stifled the growth of the city by withholding funding and support for any project not directly related to the workings of the government After decades of stagnation only the more pragmatic approach begun in the Jacksonian era succeeded in fostering development in the District And throughout these decades driven by a mixture of self interest and national pride local leaders worked to make Washington s vision a reality and to earn the respect of the nation George Washington s Washington is not simply a history of the city during the first president s life but a history of his vision for the national capital and of the local and national conflicts surrounding this vision s acceptance and implementation **The American Review of Reviews** Albert Shaw,1915 **The Essential Facts of American History** Lawton Bryan Evans,1917
