Young Italian Architects:

Giovani Architetti Italiani Mario Campi, Pippo Ciorra, 1998 An informative overview for all who desire a well founded orientation within the current Italian architectural scene The most interesting talented young Italian architectural offices are featured in this collection with new and previously unpublished buildings and projects *Giovani Architetti Italiani, 2*, 2006

Giovani Architetti Italiani, 1, 2006 *Italian Modernisms* Sergio Poretti, 2015-02-17T00:00:00+01:00 The studies in this book focus on Italian twentieth century architecture in particular design and construction techniques The descriptions of the worksites and building processes provide a much better and clearer picture of the different modernist styles that existed in Italy they also reveal the thin red line that characterised an univocal construction method mixed masonry enriched and not replaced by reinforced concrete a technique well suited to small artisanal worksites This was a mild version of modern construction in line with the role construction played in slowing down an industrialisation process which in Italy was in itself slow Each chapter illustrates a specific aspect of the history of construction and highlights several new issues involving architecture in general the important tectonic similarities which one way or another link the Littorio style and the several different kinds of rationalisms in the thirties the continuity between the autarchic experimentation and the techniques used in reconstruction the connection between the large scale works designed by engineers and the architectures of the fifties and sixties which now appear to be one of the mainstays of the unique Italian Style *Luigi Moretti* Roberto Podda, 2024-08-01 Luigi Moretti *Lessons of SPAZIO* focuses on the theoretical work of the Italian architect Luigi Moretti Rome 1906 1973 It does so selectively focusing on the editorials he published between 1950 and 1953 as editor in chief of the magazine SPAZIO as well as a further essay on parametric architecture published in 1971 1972 in the first issue of the magazine MOEBIUS directed by his friend Giulio Roisecco This book rediscovers Moretti s personal impact on international architectural theory through thoughtful comments that shed light on the architect s modernity and original approach Although Moretti is an architect renowned for his projects and buildings his theoretical essays are less well known The aim of this book is therefore to explore Moretti s theoretical work which covers many topics including pictorial art sculpture architecture urban planning music cinema poetry mathematics computer science parametricity In addition to the translation from Italian to English the book contains reproductions of the original articles accompanied by a series of essays of critical commentary and updated interpretations that show new ways of approaching reading and understanding the foundations of current architectural theory and its progress over the last 50 years This book approaches Moretti s thought from a new perspective with the aim of reconsidering the originality of this brilliant and visionary architect who was intellectually ostracised for many years due to political and ideological contingencies even though he personified the ideal of the Renaissance man in modern times A re reading of Moretti s work is more justified today than has ever been before both to reconnect the threads with contemporaneity and to make his intensity and farsightedness of vision known to researchers teachers and students working

in the areas of architecture and design theory technology and art today [Giovani Architetti Italiani](#) Mario Campi, Pippo Ciorra, 1998 An informative overview for all who desire a well founded orientation within the current Italian architectural scene The most interesting talented young Italian architectural offices are featured in this collection with new and previously unpublished buildings and projects [TOTalitarian ARTs](#) Mark Epstein, Fulvio Orsitto, 2017-03-07 This collection represents a tool to broaden and deepen our geographical institutional and historical understanding of the term totalitarianism Is totalitarianism only found in other societies How come then it emerged historically in ours first How come it developed in so many countries either in Western Europe Italy Germany Portugal and Spain or under implicit Western forms of coercion Latin America How do relations between individual s mass and the visual arts relate to totalitarian trends These are among the questions this book asks about totalitarianism The volume does not impose a one size fits all interpretation but opens new spaces for debate on the connection between the visual arts and mass culture in totalitarian societies From the Mediterranean to Scandinavia from Western Europe to Latin America from the fascism of the early 20th century to contemporary forms of totalitarian control and from cinema to architecture the chapters included in TotArt bring expertise historical sensibility and political awareness to bear on this varied range of phenomena This collection offers international contributions on visual performing and plastic arts The chapters range from examination of comics to study of YouTube videos and American newsreels from Italian Spanish Portuguese and Uruguayan cinemas to more contemporary American films and TV series from painters and sculptors to the study of urban spaces [Italian All-in-One For Dummies](#) Antonietta Di Pietro, Francesca Romana Onofri, Teresa L. enterprise and construct a vital tourist industry Although most tourists sought to escape the trappings of the metropole in favor of experiencing difference that difference was almost always framed contained and even defined by Western culture McLaren argues that the modern and the traditional were entirely constructed by colonial authorities who balanced their need to project an image of a modern and efficient network of travel and accommodation with the necessity of preserving the characteristic qualities of the indigenous culture What made the tourist experience in Libya distinct from that of other tourist destinations was the constant oscillation between modernizing and preservation tendencies The movement between these forces is reflected in the structure of the book which proceeds from the broadest level of inquiry into the Fascist colonial project in Libya to the tourist organization itself and finally into the architecture of the tourist environment offering a way of viewing state driven modernization projects and notions of modernity from a historical and geographic perspective This is an important book for architectural historians and for those interested in colonial and postcolonial studies as well as Italian studies African history literature and cultural studies more generally
