# Social Work, Health and Equality

---

Deepening health inequalities, the restructuring of the welfare state involving the fragmentation of social work as a recognisable discipline and popular disaffection with health and welfare professionals underline the need to rethink social work's contribution to people's health.

In three main ways *Social Work, Health and Inequality* suggests what social work can contribute to people's health:

- the magnitude of the profound and unjust human suffering which arises from the impact of social inequalities on health should be a matter of urgent concern to social workers.
- through focusing on this problem, social work can make a significant contribution to more equal chances and experiences of health and illness.
- to make such an impact requires major shifts in the conceptualisation, practice and organisation of social work.

*Social Work, Health and Equality* will be essential reading to trainees and professionals in social work and health care.
