Bases for an Innovative Sustainable Socially Responsible Society Volume II Matjaž Mulej, Anita Hrast, Tjaša Štrukelj, Borut Likar, Simona Šarotar Žižek, 2026-01-01 This two volume edited collection is intended to be a contribution to humankind s efforts to find its way out from the global long lasting socio

economic crises that have been visible in one form or another since 2008 and has been caused by the monopolistic abuse of free markets and democracy and the replacement of the Keynesian economic model and state capitalism with neoliberalism. The carefully chosen contributions rest on three principles that we can achieve neither social responsibility nor sustainability if we do not incorporate innovation into a given practice, the importance of non-technological and user-friendly innovations in mutual relations, and the role of technological innovations that make healthy living and work easier. This second volume explores the systems theories that can support Innovative Sustainable Socially Responsible Society (ISSRS). Topics covered include innovative sustainable HRM, integral green society, non-financial reporting, and multi-criteria evaluation for creative thinking. This academically grounded work will be of great interest to students and scholars of sustainability, innovation management, digital business, and sociologists of work.

CSR and Socially Responsible Investing Strategies in Transitioning and Emerging Economies Kuna-Marszałek, Anetta, Kłysik-Uryszek, Agnieszka, 2020-01-17

One of the most important activities of enterprises today is responsible entrepreneurship. Corporate social responsibility (CSR) activities can help to forge a stronger bond between employees and corporations, can boost morale, and can help both employees and employers feel more connected with the world around them. Moreover, the growing importance of this concept results from the fact that it is perceived as an effective tool for increasing competitiveness, improving the image of the company, or contributing to the generation of higher profits. In today's world, an active commitment to social responsibility is becoming more common for a company.

CSR and Socially Responsible Investing Strategies in Transitioning and Emerging Economies is an essential reference source that identifies the scale and scope of implementation of CSR and socially responsible investing strategies and standards in companies operating in different transitioning and emerging economies, as well as assessing the global effects of these activities. Featuring research on topics such as economic growth, responsible investing, and business ethics, this book is ideally designed for managers, executives, directors, corporate professionals, government officials, industry leaders, academicians, students, and researchers in the fields of international economics, international business, marketing, finance, management, and public relations.

Is there a Willingness-to-pay for Social Responsibility? Hendrik Overwien, 2021-09-10

Bachelor Thesis from the year 2018 in the subject Business economics, Investment and Finance, grade 1.7, University of Münster, language English, abstract.

The aim of this literature-based bachelor thesis is not only to prove the existence of a willingness to pay for social responsibility but also to highlight significant factors that influence individual behaviour. First, two decision-making concepts will be described. Afterwards, the willingness to pay for social responsibility will be analysed, comparing both the consumer perspective and the investor perspective. This procedure allows a greater understanding and comparison of human behaviour in different situations. Even though both perspectives will be discussed
