The Design Of Fiction

Edward Bulwer Lytton Baron Lytton

The Design Of Fiction:

Research Fiction and Thought Experiments in Design Mark Blythe, Enrique Encinas, 2018 Any design process involves an imaginative act a picturing of the world as other than it is Fiction has long played a part in design research in the form of scenarios personas sketches paper based prototypes simulations prototypes and speculative design The term design fiction has been adopted to describe more elaborate and detailed representations of products and services that do not exist yet Design fiction is an emerging practice and there are several competing definitions and forms This article traces design fiction from the Italian radical design of the 1960s through British Art Schools in the late 1990s to contemporary adaptations of the practice by companies like Google Microsoft and Facebook Design fiction is now produced regularly by individuals launching Kickstarter campaigns corporations selling visions of future products and governments imagining new digital services But there is little agreement about the status of such fictions what constitutes a good fiction How does fiction relate to research In what sense does fiction contribute to existing knowledge Although fiction can sometimes result in accurate prediction this is not its main value It is rather the creation of ambiguous artefacts that help us think carefully about emerging technologies and their potential impact Although fiction may seem to be the antithesis of empirical enquiry it is often employed in the form of thought experiments in Physics Mathematics Ethics and Philosophy This article argues that design fiction can also be considered as a form of thought experiment Excerpts from a fictional Wikipedia article about Valdis Ozols a Latvian historian and author writing design fiction in the 1940s precede each section as think pieces about the nature and value of fiction The text is illustrated with pages from a fictional design workbook written in an invented language

The Design of Fiction Niven Terence Busch, 1974 *Writing Design Fiction* Tony Fry, 2021-10-21 Written by leading design philosopher Tony Fry *Writing Design Fiction Relocating a City in Crisis* is both an introduction to the power of design fiction in the design process and a novella length work of fiction in itself telling the dramatic story of the relocation of the City of Harshon Set in the near future Harshon a delta city is facing environmental catastrophe due to rising sea levels consequently a decision is made to relocate the entire city inland A diverse cast of voices including an architect a journalist an economist a construction worker and residents narrate the extraordinary challenges and complexities which follow This work presents a real world scenario which in coming decades will face many of the world's cities The fictional format provides a novel way of exploring the very serious inherent technical social political economic and cultural challenges The story provides a rehearsal of the design challenges which are likely to face architects planners and designers in an uncertain global future Design fiction is a fast growing area within design and architecture increasingly deployed as a serious methodology by designers as a tool in scenario planning *Writing Design Fiction* takes the practice to a higher level conceptually and theoretically but also practically The book is divided into four parts with the fictional narrative bookended by further critical analysis Part One shows how a critique of existing modes of design fiction can lead to more grounded and

critical thinking and practice Part Three critically reflects on the narrative while Part Four presents the practical application of the second order design fiction approach This book demonstrates the value of a more developed mode of design fiction to students professional designers and architects across the breadth of design practices as well as to other disciplines interested in the future of cities *The Art of Fiction* Walter Besant,1885 **Universal Methods of Design Expanded, and Revised** Bruce Hanington,Bella Martin,2019-10-22 This expanded and revised version of the best selling Universal Methods of Design is a comprehensive reference that provides a thorough and critical presentation of 125 research methods synthesis analysis techniques and research deliverables for human centered design The text and accompanying photos and graphics of this classic resource are delivered in a concise and accessible format perfect for designers educators and students Information can be easily referenced and utilized by cross disciplinary teams in nearly any design project This new expanded edition includes a comprehensive index for referencing Earlier chapters have been updated to include new information on digital design and software for A B testing content analysis and territory maps The addition of 25 chapters brings fresh relevance to the text with new and innovative design methods such as subtraction and position maps that have emerged since the first edition Universal Methods of Design distills each method down to its essence in a format that helps design teams select and implement the most credible research methods suited to their design culture Speculative Everything, With a new preface by the authors Anthony Dunne,Fiona Raby,2024-04-02 How to use design as a tool to create not only things but ideas to speculate about possible futures Today designers often focus on making technology easy to use sexy and consumable In *Speculative Everything* Anthony Dunne and Fiona Raby propose a kind of design that is used as a tool to create not only things but ideas For them design is a means of speculating about how things could be to imagine possible futures This is not the usual sort of predicting or forecasting spotting trends and extrapolating these kinds of predictions have been proven wrong again and again Instead Dunne and Raby pose what if questions that are intended to open debate and discussion about the kind of future people want and do not want *Speculative Everything* offers a tour through an emerging cultural landscape of design ideas ideals and approaches Dunne and Raby cite examples from their own design and teaching and from other projects from fine art design architecture cinema and photography They also draw on futurology political theory the philosophy of technology and literary fiction They show us for example ideas for a solar kitchen restaurant a flypaper robotic clock a menstruation machine a cloud seeding truck a phantom limb sensation recorder and devices for food foraging that use the tools of synthetic biology Dunne and Raby contend that if we speculate more about everything reality will become more malleable The ideas freed by speculative design increase the odds of achieving desirable futures Design, User Experience, and Usability. Design for Contemporary Interactive Environments Aaron Marcus,Elizabeth Rosenzweig,2020-07-10 This book constitutes the refereed proceedings of the 9th International Conference on Design User Experience and Usability DUXU 2020 held as part of the 22nd International Conference on Human Computer
