## **The Neurosciences Third Study Program:**

**The Neurosciences** Francis O. Schmitt, 1974      **The Neurosciences** Francis O. Schmitt, Gardner C. Quarton, Theodore Melnechuk, 1974      **Paperback Series Comprising Sections Drawn from The Neurosciences**, 1975      **The Neurosciences: Paths of Discovery**, I F. WORDEN, J. SWAZEY, G. ADELMAN, 2012-12-06 To commemorate properly the 70th birthday of a man who by his very nature is too busy to pause for any kind of ceremonial event unless it has a concomitant functional output was a difficult problem for the Staff and Associates of the Neurosciences Research Program Frank F O S has always dreaded the prospect that sometime it might be appropriate for his colleagues to present him a Festschrift In fact Festschriften became his battle cry expressing his feeling that the idea of testimonials clustered into a book was anathema So the breakthrough idea for the planners was to organize a symposium around the theme of discovery in neuroscience that would be valuable scientifically and in its demonstration of interdisciplinary interaction would support that emphasis in Frank's career After much planning a program was developed beginning with a birthday party the evening before followed by the two day symposium and closing with the first F O Schmitt Lecture in Neuroscience We hope that publication of the scientific proceedings in this volume will be of interest not only to the neuroscience community but also to a broad general readership interested in discovery understanding and the creative processes in scientific work An organizing committee chaired by Fred Worden collected advice and guidance leading to the selection of speakers whose scientific careers have played an important part in the recent history of modern neuroscience      Commentaries in the Neurosciences A.
