The New Ecological Order

Wen Pei Sung, Jimmy Chih Ming Kao

The New Ecological Order:

The New Ecological Order Luc Ferry, 1995-08-15 Is ecology in the process of becoming the object of our contemporary passions in the same way that Fascism was in the 30s or Communism under Stalin In The New Ecological Order Luc Ferry offers a penetrating critique of the ideological root of the Deep Ecology movement spreading throughout the United States Germany and France Traditional ecological movements or democratic ecology seek to protect the environment of human societies they are pragmatic and reformist But another movement has become the refuge both of nostalgic counterrevolutionaries and of leftist illusions This is deep ecology Its followers go beyond practical critique of human greed and waste they call into question the very possibility of human coexistence with nature Ferry launches his critique by examining early European legal cases concerning the status and rights of animals including a few notorious cases where animals were brought to trial found guilty and publicly hanged He then demonstrates that German Romanticism embraced certain key ideas of the deep ecology movement concerning the protection of animals and the environment Later adopted by the Nazis many of these ideas point to a profoundly antihumanistic component of deep ecology that is compatible with totalitarianism Ferry shows how deep ecology casts aside all the gains of human autonomy since the Enlightenment Far from denying our duty in relation to nature The New Ecological Order offers a bracing caution against the dangers of environmental claims and more important against the threat to democracy contained in the deep ecology doctrine when pushed to its extreme

The Civilized Organization Ad van Iterson, Willem Mastenbroek, Tim Newton, Dennis Smith, 2002-10-29 This book brings a major new resource to organization studies the work of Norbert Elias By applying his ideas in a critical but sympathetic way the authors provide a new perspective on the never ending stream of management fads and fashions Standing back and taking a more detached perspective inspired by the work of Norbert Elias 1897 1990 it becomes clear that many new types of organizations are often variations on an old theme Elias gives us considerable purchase on current debates through his emphasis on long term historical perspectives his highlighting of issues of power emotion and subjectivity his interweaving of analysis at the level of the state the organization groups and individuals his alternative take on issues of agency and structure and his relevance to a wide range of current organization theories The contributions show the current relevance of Elias s work in numerous fields of organizational analysis such as the sociology of finance and markets the comparative and cross cultural study of organization comparative management development organizational meetings organizational boundaries gossip and privacy in organizations emotion in organizations and the significance of humiliation within organizations It is indeed time for Elias

French 'Ecocritique' Stephanie Posthumus, 2017-10-31 French cocritique is the first book length study of the culturally specific ways in which contemporary French literature and theory raise questions about nature and environment Stephanie Posthumus s ground breaking work brings together thinkers such as Guattari Latour and Serres with recent ecocritical theories to complicate what might

otherwise become a reductive notion of French ecocriticism Working across contemporary philosophy and literature the book defines the concept of the ecological as an attentiveness to specific nature culture contexts and to a text s many interdiscursive connections Posthumus identifies four key concepts ecological subjectivity ecological dwelling ecological politics and ecological ends for changing how we think about human nature relations French cocritique highlights the importance of moving beyond canonical ecocritical texts and examining a diversity of cultural and literary traditions for new ways of imagining the environment

Anthropocentrism and Its Discontents Gary Steiner,2005-11-06 Anthropocentrism and Its Discontents is the first ever comprehensive examination of views of animals in the history of Western philosophy from Homeric Greece to the twentieth century In recent decades increased interest in this area has been accompanied by scholars willingness to conceive of animal experience in terms of human mental capacities consciousness self awareness intention deliberation and in some instances at least limited moral agency This conception has been facilitated by a shift from behavioral to cognitive ethology the science of animal behavior and by attempts to affirm the essential similarities between the psychophysical makeup of human beings and animals Gary Steiner sketches the terms of the current debates about animals and relates these to their historical antecedents focusing on both the dominant anthropocentric voices and those recurring voices that instead assert a fundamental kinship relation between human beings and animals He concludes with a discussion of the problem of balancing the need to recognize a human indebtedness to animals and the natural world with the need to preserve a sense of the uniqueness and dignity of the human individual

Michel Serres Christopher Watkin,2020-02-14 Christopher Watkin provides a true overview of Serres thinking Using diagrams to explain Serres thought the first half of the book carefully explores Serres global intuition how he understands and engages with the world and his figures of thought the repeated intellectual moves that characterise his unique approach The second half explores in detail Serres revolutionary contributions to the areas of language objects and ecology All told Watkin shows that Michel Serres has produced a cross disciplinary body of work that provides a crucial and as yet under exploited reference for current debates in post humanism object oriented ontology ecological thought and the environmental humanities

[Conflicting Philosophies and International Trade Law](#) Michael Burkard,2017-10-17 This book reveals how conflicting worldviews are at the root of public controversies on policy and trade issues It highlights the particularly controversial disputes at the level of the World Trade Organization in the case of regulating beef hormones and GMOs aiming to show how negotiators of international agreements members of dispute settlement bodies and policy makers in general could have recourse to concepts of other disciplines such as epistemology and philosophy in order to address deadlocked legal disputes Ultimately the book is a manifesto for independent and critical research

Primitive Passions Marianna Torgovnick,1997 Beginning with early 20th century figures among them Carl Jung Isak Dinesen and Georgia O Keeffe who found in the primitive a medium for soul searching and personal change Torgovnivk probes how the return to the primitive has signaled a quest to transcend the
