Translation Criticism The Potentials And Limitations:

Translation Criticism, the Potentials and Limitations Katharina Reiss, 2000 This is an English translation of Katharina Reiss's contribution to translation studies Her work first appeared in 1971 and this translation shows more clearly Reiss's treatment of a central theme in translation how to develop reliable criteria for the systematic evaluations of translations This is an English translation of Katharina Reiss's contribution to translation studies Her work first appeared in 1971 and this translation shows more clearly Reiss's treatment of a central theme in translation how to develop reliable criteria for the systematic evaluations of translations Using varied examples the author offers a pragmatic approach to text analysis a functional perspective on translation and a specific view of the translator The book covers important aspects of the translation process such as the text the conditions which determine the translator's decisions and the translator as an individual whose personal interpretation has to be respected This translation has much of the original presentation but with the changing terminology some has been changed to make it more accessible to today's reader

Translation Criticism Katharina Reiss, 2004 Translation Criticism- Potentials and Limitations Katharina Reiss, 2014-04-23 Katharina Reiss's now classic contribution to Translation Studies *Möglichkeiten und Grenzen der Übersetzungskritik Kategorien und Kriterien für eine sachgerechte Beurteilung von Übersetzungen* first appeared in 1971 This is the first English translation of this major work allowing students and practitioners of translation in the English speaking world to make more extensive use of Reiss's pioneering treatment of a central theme in translation how to develop reliable criteria for the systematic evaluation of translations Using a wealth of interesting and varied examples Reiss offers a systematic and illuminating text typology a pragmatic approach to text analysis a functional perspective on translation and a hermeneutic view of the translator thus accounting for some of the most important aspects of the translation process the text both source and target versions the conditions which determine the translator's decisions and the translator as an individual whose personal interpretation has to be respected by any critic In the three decades since Katharina Reiss wrote the terminology of translation studies has evolved on many fronts Erroll Rhodes translation strikes an optimal balance between remaining faithful to the original presentation and using terminology that today's reader would generally understand and value

□□□□ Katharina Reiss, □□, 2004 *The Translator*, 2006 Legilinguistic Translatology Aleksandra Matulewska, 2013 The author proposes a theory of legal translation the aim of which is to formulate postulates and dimensions used to characterize legal texts and their component parts for the purpose of establishing relevant meanings and choosing proper translative equivalents for a selected legal communicative community of translation recipients

The Problem with Reading Hannah Arendt in English Gerhard Brauer, 2008 The author argues that Hannah Arendt's self translation of her book *The Human Condition* from excellent German into poor English significantly and unnecessarily compromised its readability

Arendt could have asked for editorial assistance with her English but clearly chose not to do so On the basis of this premise the author goes on to suggest that there may be a larger as yet unremarked educational problem in the English speaking world translated philosophy texts are assigned for reading without making students aware of the impact that translation can have on coherence The naive acceptance by English only readers of incoherent wording as though it were a mark of stylistic eccentricity or semantic innovation is defined as the translation induced lionization of text or TILT The problem is further exacerbated by an epidemic of infectious monolingualism in the English speaking world While a return to polyglotism in higher education once a highly valued skill directly relevant to the reading and understanding of philosophical and literary works would be ideal the teaching of translation theory plus slow reading is proposed as a more realistic and very feasible solution

Translation Review ,1998 The Study of Language and Translation Willy Vandeweghe, Sonia Vandepitte, Cercle belge de linguistique, 2007 The volume contains a selection of papers from the congress on the topic of The Study of Language and Translation held in Ghent in January 2006 Its theme is the interface between Linguistics and Translation Studies The volume hosts contributions from leading scholars in the field such as Mona Baker Andrew Chesterman Christiane Nord and others Some articles are theoretical but the majority relies on empirical data Many of those are in some way or another tributary to the corpus approach with translation universals as a recurring theme Various methodologies are suggested for the investigation of similarities metacommunication borrowings collocations and other topics The differences between translations and their source texts and those between translated and non translated texts are explored in various ways The findings yield hypotheses about the mechanisms in the process of translation and the cognitive viewpoint is never far away As a whole the volume presents the richness of the field of descriptive Translation Studies and the complexities involved in its linguistic approach
