Sustainable Practices in the Fashion and Retail Industry Tarnanidis, Theodore, Papachristou, Evridiki, Karypidis, Michail, Manda, Vijaya Kittu, 2025-03-07 Sustainable shopping practices are becoming more prevalent in the fashion and retail industry as consumers demand more ethical and environmentally friendly products. The industry's negative environmental and social impacts are being reduced through these efforts which often create high levels of waste, pollution, and exploitation. Technological advancements, shifting values, and changing economic and environmental conditions are shaping the future of consumer shopping habits. As the impact of consumers on society and the environment grows and digital innovations alter the way people interact with brands, the retail landscape is expected to change significantly. Further exploration of these sustainable practices may provide improved solutions for environmentally conscious fashion and retail businesses. *Sustainable Practices in the Fashion and Retail Industry* explores the continuing trends of sustainable techniques and practices in the fashion and retail business. It examines how consumer habits are evolving toward more thoughtful, personalized, and technology-driven experiences that align with modern values and lifestyles. This book covers topics such as green marketing, social media, and circular economy and is a useful resource for business owners, policymakers, entrepreneurs, economists, academicians, and researchers.

Sustainable Solutions for E-Waste and Development K. V., Rajesh Kumar, Kannan, Hemachandran, Spodarets, Dmitry, Khan, Parvez Alam, Pradhan, Bikash Kumar, 2024-02-07 The burden of global electronic waste or e-waste grows heavier by the day, demanding we take a closer look at the obscure hazards lurking within electronic devices. E-waste takes a calamitous toll on ecosystems and human well-being, necessitating immediate action. *Sustainable Solutions for E-Waste and Development* is an academic reference source that takes an incisive journey through the nexus of sustainable development and the surging menace of e-waste. In an age where our lives are orchestrated by gadgets, this book uncovers the profound repercussions that these marvels bear upon our environment, societies, and economies. As the dawn of an imperative revolution beckons, this book casts a discerning eye on unconventional strategies propelling readers into the realm of pioneering e-waste management, recycling ventures, and circular economy paradigms. It offers a panoramic view of policy blueprints and technological frontiers that could herald a future harmonizing technological progress with environmental sustainability. The book's compendium of recent research, revelations, exemplars, and best practices fosters an ecosystem of collaborative inquiry. Written and edited with the cognizance of the topic's wide audience, the book bridges academic rigor with accessible exposition. From scholars engrossed in environmental science, technology, and sustainable development to policymakers crafting the global legislative tapestry, this publication's relevance transcends boundaries.

Design and Assessment of Sustainable Products Magdalena Wojnarowska, Carlo Ingraio, 2024-12-30 This book questions the current definition of what makes a product sustainable and argues that a holistic approach to sustainable product design is required, one that considers all aspects of a product's life cycle from design to production to use and then

final disposal This edited collection introduces a new set of methods and tools aligned with the concept of comprehensive sustainable produce design that integrates the environmental and social benefits of a product in line with the principles of a circular economy It provides a comprehensive understanding of the theoretical and practical framework that underpins a sustainable product highlighting the multiple key roles of eco design innovation quality and sustainability The authors describe the criteria for which products can be defined as being sustainable and outline how different manufacturing technologies influence the value of those products and the place they can find on the market accordingly The book s significant contribution lies in identifying the critical factors that are needed to successfully implement the framework throughout the entire life cycle of the product in a holistic integrated approach This book will be of interest for researchers and students studying sustainable product design environmental studies engineering and sustainable business management It will also be a useful resource for representatives of the business community managers technicians decision makers and consumers interested in sustainable product design issues

Eco-Innovation and Green Productivity for Sustainable Production and Consumption, 2nd edition Munir Ahmad,Cem Işık ,Zeeshan Fareed,2025-09-12 With the graduation of time the desire for enhanced production and consumption scales motivated the global economies to opt for the race to the bottom approach leading to environmental unsustainability On the one hand economies focused on escalated production levels proliferating non renewable energy consumption and reducing energy productivity leading to production based carbon dioxide CO2 emissions On the other hand international trade of high CO2 emissions embedded goods has skyrocketed the consumption based CO2 emissions Since production and consumption based CO2 emissions challenge environmental sustainability there is an urgent need to pursue sustainable production and consumption to realize the United Nations Sustainable Development Goals SDGs dream In this regard eco innovation came into play to transition the conventional production setup to a cleaner production mode Eco innovation involves all types of technological advancements extending contributions to the SDGs In this regard climate technologies and environmental technologies involving renewable energy e g wind solar biogas energy efficient technologies e g energy efficient electric appliances environmental pollution reduction technologies e g carbon scrubbing filters water purifiers waste mitigation technologies play a tremendous role in mitigating climatic adversities and environmental unsustainabilities By contributing to the responsible use of natural capital eco innovation facilitates efficient energy utilization improving energy productivity as well as environmental sustainability Moreover eco innovation has the inherent potential to aggravate sustainable production modes through green productivity a tool to enhance industrial outputs with fewer harms to the environment As a progressive move green productivity growth

promotes a new trend of producing more economic output by consuming fewer resources and safeguarding ecosystems. The mainstream empirical literature substantiated that eco innovation and green productivity remained critical players in limiting CO₂ emissions and promoting environmental sustainability. Literature also witnessed that eco innovation ameliorated energy productivity by motivating the countries to adopt cost saving and environmentally friendly technologies. On the contrary, the rebound effect supported the environmental deterioration impact of such technologies. Against this backdrop, this Research Topic will provide an opportunity to further delve into the influencing mechanisms triggered by eco innovation and green productivity growth on energy productivity and environmental sustainability for a futuristic perspective of sustainable production and consumption. This Research Topic welcomes theoretical and empirical original research articles and reviews. Research themes and areas include but are not limited to the following: Links between eco innovation, green productivity growth, and energy productivity for sustainable production; Climate technologies and carbon neutrality applications for sustainable production; Firm level environment related innovation practices; Renewable and energy efficient industrial transition for sustainable production; Eco innovation through the firm life cycle for sustainable production and consumption; Green innovation driven business models for sustainable production; Climate technology driven policies for sustainable production and consumption; Eco innovation and zero emissions agenda implementation.

Circular Economy and Re-Commerce in the Fashion Industry Shrivastava, Archana, Jain, Geetika, Paul, Justin, 2020-06-19. The apparel industry has the scale, reach, and technical expertise to deliver on target sustainable development goals within the industry's sphere of influence in its interconnected global and local value chains. From the farm to the consumer, the textile, retail, and apparel production industry has an array of economic, environmental, social, and governance impacts. In order to meet sustainable goals, the industry is challenged to buy and produce goods and services that do not harm the environment, society, and the economy. Circular Economy and Re-Commerce in the Fashion Industry is a pivotal reference source that explores and proposes solutions for best practices to meet sustainable development goals in the fashion industry and provides guidelines for assessing the technological landscape and modeling sustainable business practices.
