

Types of Sociological Analysis

Introduction

There is no one correct way to look at society

To understand how society works, sociologists use a range of different approaches and techniques.

There are five common approaches, and they are often used in combination with one another

Network Analysis

Focuses on examining the patterns of social ties among people in a group, and what those patterns mean for the group as a whole

Microsociological Analysis

Involves looking at the one-to-one interactions between individuals

For example, how women negotiate their identities for job interviews or personal relationships

Quantitative Analysis

Is the study of society using numbers and statistics

For example, measuring poverty across a number of states, or a split of their education to grade level, or a number of years

Macrosociological Analysis

Is looking at the "big picture"

That includes historical change over decades or hundreds of years, the rise and fall of political systems or class hierarchies

Qualitative Analysis

Is to study society by getting to know people and situations in detail, then describing their going words

For example, interviewing people about their experiences in the workplace and the home
