or can't seem to settle down at night it's because he is by nature a poor sleeper. However, this is rarely the case. Virtually all children without major medical or neurological disorders are able to sleep well. It may be tempting to assume that your child is one of the few children who have difficulty sleeping, but that is almost never the case. Most children have a normal ability to fall asleep and remain asleep, even if they have a sleep disturbance such as sleepwalking or bedwetting. *Keys to Children's Sleep Problems* Susan E.
