Monk,1987 Over the past century women artists and writers have expressed diverse creative responses to the landscape of the Southwest The Desert Is No Lady provides a cross cultural perspective on women by examining Anglo Hispanic and Native American women s artistic expressions and the effect of their art in defining the southwestern landscape The Desert Is No Lady has been made into a motion picture of the same title by Women Make movies New York NY A beautifully crafted book Although it varies in intensity the response of women to the environment is virtually always different from the male frontiersman s view of the land as inanimate boundless conquerable and controllable Polly Wells Kaufman in Women s Review of Books A powerful masterpiece Eve Gruntfest in The Professional Geographer **Art and Geology** Rita Deanin Abbey,G. William Fiero,1986 Here are the striking paintings of artist Rita Deanin Abbey juxtaposed against natural earth formations photographed by G William Fiero and in the often poetic text which accompanies the visual and intellectual awakening they express is the answer Images that emerge in the art from an intuitive creative process reflect a close connection to existing forms in nature The artist brings her perceptions to the task of creating a unified composition out of the limitless number of elements at her disposal The geologist trained as a scientist to divide into segments all he perceives finds the desert a perfect setting for inquiry by understanding the pieces he hopes to gain knowledge of its overall composition This unique fusion of art and science has produced an original challenging and supremely stimulating book a book which provides a new way of looking at the earth upon which we live Back cover **The Desert** Michael Welland,2014-09-15 From endless sand dunes and prickly cacti to shimmering mirages and green oases deserts evoke contradictory images in us They are lands of desolation but also of romance of blistering Mojave heat and biting Gobi cold Covering a quarter of the earth s land mass and providing a home to half a billion people they are both a physical reality and landscapes of the mind The idea of the desert has long captured Western imagination put on display in films and literature but these portrayals often fail to capture the true scope and diversity of the people living there Bridging the scientific and cultural gaps between perception and reality The Desert celebrates our fascination with these arid lands and their inhabitants as well as their importance both throughout history and in the world today Covering an immense geographical

range Michael Welland wanders from the Sahara to the Atacama depicting the often bizarre adaptations of plants and animals to these hostile environments He also looks at these seemingly infertile landscapes in the context of their place in history as the birthplaces not only of critical evolutionary adaptations civilizations and social progress but also of ideologies Telling the stories of the diverse peoples who call the desert home he describes how people have survived there their contributions to agricultural development and their emphasis on water and its scarcity He also delves into the allure of deserts and how they have been used in literature and film and their influence on fashion art and architecture As Welland reveals deserts may be difficult to define but they play an active role in the evolution of our global climate and society at large and their future is of the utmost importance Entertaining informative and surprising The Desert is an intriguing new look at these seemingly harsh and inhospitable landscapes [The Desert Encyclopedia](#) Robert Hauptman,2024-08-06 This reference work is the first English language A Z compendium on all topics related to deserts including geography geology meteorology climatology hydrology botany zoology anthropology art music film culture sports as well as the specific and diversely different deserts that one finds in all parts of the world Definitions explanations and clarifications will be contained in more than 2 300 entries that vary in length from a brief sentence to detailed overviews of more complex subjects The Desert Encyclopedia will be invaluable as a source of data and information but it is also enjoyable to read straight through It is also replete with line drawings black and white illustrations maps and images from outstanding photographers [In the Desert](#) Lisle March Phillipps,1909 **Six Paintings from Papunya** Fred R. The Palm Springs School: Desert Modernism 1934-1975 Alan Hess, 2025-02-11 Palm Springs is at the center of a unique tradition in architecture marked by invention and a sensitivity to local conditions that has resulted in design that exerts an influence far greater than the town's small size The book is the first to fully explore the wide ranging forms this architecture has taken from houses to gas stations hotels to airports banks to restaurants and spas Much more than a resort destination Palm Springs has served as a laboratory of the Modern here so much architectural innovation and design took form From the steel and glass boxes of Richard Neutra to the earthy organic homes of John Lautner and everything in between the solutions of architects and designers including notably William F. Cody E. Stewart Williams and Albert Frey were diverse and are ever more relevant in the face of contemporary challenges Their answers addressed questions that still hold urgency How to design sustainably in harsh climates How to use technology efficiently and creatively to meet those challenges How to build affordable and high quality mass produced housing How to reflect a region's culture economy and distinctive atmosphere Architects here responded to nature's climatological demands and Palm Springs became a center for innovations that were rooted in practice more than theory Benefitting from the architectural freedoms offered by the remoteness of the California desert designers explored new approaches that we can now identify as central to the Palm Springs School shown here in rich
