edition of Teaching Mathematics for the 21st Century continues to help teachers let the secret out to open up to their
students the wonderful discoveries and challenges of the pattern making and problem solving aspects of a fascinating subject
mathematics The rationale remains the same to enable prospective and current teachers to access and use tools and
strategies to effectively teach mathematics to contemporary students Changing demographics knowledge of how people
learn and technology all impact the way we educate our young people This edition incorporates lessons and strategies from
programs that have proven success in many types of classrooms Many of these examples help students connect mathematics
to real life situations and communicate their understanding of the underlying concepts Although technology is constantly
being upgraded ways to increase student motivation through its application remains a goal For example since applets can
enhance a lesson whether the teacher uses a computer projector a smart board or has students work individually on
computers we have identified several sources of mathematics applets that can be correlated to various lessons Research
citations and summaries have been updated to reflect current information on teaching and learning For future teachers
