**Biohackers Magazine Issue 16** Biohackers, Progress It's a word with meanings of advancement improvement and a clear change towards a goal or objective From the moment humans have inhabited this Earth our whole existence as a species has experienced Progress as well as Decay Civilizations had flourished and progressed for many years and then decayed slowly and rotted over time until there was little to nothing left What is left however are usually things that we following civilizations have studied and learned from The remnants of civilizations are usually the teachings technologies and tools that outlast them History does love to repeat itself and leave the following generations wondering what their marks on the world and human progress will be Going beyond the terminology and historical examples one can ask some more insightful profound questions The first is why is there progress or decay in the first place There is of course no clear answer to this but I suppose it can be best summed up with the phrase First there is time And then there is what you do with it By that I mean that there is a natural order to the way things are and that to accept that there is life given to each and every being also means one's acceptance of this law of progress and decay We as humans are bound to grow just as we're bound to shrink into old age Although we cannot change this supernatural law of the universe we can in many cases choose how fast we progress or decay We can use our rational human brain towards the consistent progression of ourselves our community and our world We can do this through sustained faith and steady discipline In turn this decreases the decaying rate On the other hand through the coddled comfort of selfishness and endless pity we can do just the opposite and plateau our progress while accelerating our rate of decay One of the main reasons I like Biohacking is because of its communal camaraderie continually focusing on progress In fact many famed biohackers discovered and healed themselves through biohacking after finding themselves in a deathly sick cycle of decay and depression Biohacking when used safely conservatively and respectfully can help us determine what it is that we need to progress in how we can do it as well as how we can measure it

and why we should progress and become the best version of ourselves We as individuals families and communities can learn a lot through our experiences with decay and use these dark fragments to build a brighter picture of progress overall And while history may indeed repeat itself as it continually proves we as individuals have the power to choose our rate of progression and decay Choose wisely **Biohacker's Magazine Issue 19** , At the end of our lives do we not all have the will to be able to say that we fully lived our life to the extent of our abilities In other words deep down I believe we all have the desire to leave this the world knowing that although we make mistakes and had some pitfalls we did our absolute best to be the highest level of the person we were made to be The reason we all have this desire is not a selfish one but in fact an unselfish one This is because when we are optimizing ourselves to function at our premium versions of ourselves we are providing a stronger more efficient individual to the benefit of the community as a whole Then the question arises how do we know who we are at our maximum level and better yet how do we reach this utmost level of attainment and fulfillment The answer can be summed up to one word Wisdom Wisdom is our best friend It guides us and protects us It strengthens us and nourishes us There are many other words for this Discipline Knowledge etc but Wisdom is perhaps the word with the most meaning When humans make it their mission to grow towards something higher something more transcendent than their baseline selves they are undertaking the process of acquiring wisdom Wisdom can be sought in many ways books orators experiences Biohacking in a most fundamental sense is for all intents and purposes an avenue to acquiring wisdom about ourselves both subjectively and objectively and taking this knowl edge to optimize our entire self soul mind body for purpose of healthy growth and prosperity In our forever increasingly busy world full of languishing and slothful distractions we must continually fight back the urge to give more of our time to these easy mind numbing diversions and instead see the present and long term benefits of allocating our time towards to pursuit of wisdom and optimization essentially the pursuit of happiness Prioritize your biohacks and self growth habits in your life and continue leveling up *Whitaker's Five-year Cumulative Book List* ,1958 **Whitaker's Cumulative Book List** ,1958 *Abstracts in Biocommerce* ,1990 **Bulletin of the Atomic Scientists** ,2007 *The Times Index* ,2012 Indexes the Times Sunday times and magazine Times literary supplement Times educational supplement Times educational supplement Scotland and the Times higher education supplement *Fer brou per ser lliure* Marina Ribas,2026-03-17 Un manifest de la cuina com el lloc on la nostra vida agafa sentit Cuinar s un dels actes m s universals que existeix Vertebra la nostra identitat el paisatge i la terra en qu ens reconeixem Tot i aix sovint hem arraconat les receptes pr pies per seguir modes o hem assumit que alimentar nos s un afer individual sense veure tot el que s hi amaga Amb una escriptura honesta i d arrels profundes Marina Ribas dietista pagesa i divulgadora culin ria ens obre la porta al seu univers ntim on la cuina s amor tradici i resist ncia Entre l assaig i la cr nica personal quotidiana Fer brou per ser lliure s un recorregut per les olors els records i els rituals que han marcat la nostra manera d entendre el menjar i ens convida a pensar en tot all que ens sost les tradicions les cures la comunitat i el teixit
