Conceptual Revolutions in Twentieth-Century Art David W. Galenson, 2009-09-14 From Picasso's Cubism and Duchamp's readymades to Warhol's silkscreens and Smithsonian's earthworks the art of the twentieth century broke completely with earlier artistic traditions A basic change in the market for advanced art produced a heightened demand for innovation and young conceptual innovators from Picasso and Duchamp to Rauschenberg and Warhol to Cindy Sherman and Damien Hirst responded not only by creating dozens of new forms of art but also by behaving in ways that would have been incomprehensible to their predecessors Conceptual Revolutions in Twentieth Century Art presents the first systematic analysis of the reasons for this discontinuity David W Galenson whose earlier research has changed our understanding of creativity combines social scientific methods with qualitative analysis to produce a fundamentally new interpretation of modern art that will give readers a far deeper appreciation of the art of the past century and of today than is available elsewhere

Diversity Counts Anne Dymond, 2019-06-03 Despite the common belief that art galleries will naturally become more gender equitable over time the fact is that many art institutions in Canada have become even less so over the last decade with female artists making up less than 25 per cent of the contemporary exhibitions of several major galleries In the first large scale overview of gender diversity in Canadian art exhibitions Anne Dymond makes a persuasive plea for more consciously equitable curating Drawing on data from nearly one hundred institutions Diversity Counts reveals that while some galleries are relatively equitable many continue to marginalize female and racialized artists The book pursues an interdisciplinary approach considering the art world's resistance to numeric data discourses on representation and identity changing conceptualizations of institutional responsibility over time and different ways particular institutions manage inclusion and exclusion A thoughtful examination of the duty of public galleries to represent underserved communities Dymond's study bravely navigates the unspoken criteria for acceptance in the curatorial world Demonstrating how important hard data is for inclusivity Diversity Counts is a timely analysis that brings the art world up to date on progressive movements for social transformation
