Using Video to Support Teacher Reflection and Development in ELT Laura Hope Baecher, Steve Mann, Cecilia Nobre, 2023

Currently there are many research articles across a wide array of teacher education journals that present promising practices in video as a tool in teacher learning but no practitioner friendly text that organizes a variety of approaches for application in the field. This book fills that gap by helping educators to greatly expand their repertoire and confidence in introducing, designing, implementing and assessing video based professional development. The authors focus on the variety of ways in which video can support and encourage reflection, increase awareness, foster collaboration, share practice, provide a tool for analysis, aid in materials production and establish online communities of practice. Video allows more possibilities for context sensitive noticing, editing, sharing, repackaging and tagging, especially in combination with screen capture software, and there is an increasing array of tools that can be harnessed to support teacher learning and reflection. These can help to make aspects of classrooms methodology and learning more concrete and visible. Across the chapters the book draws on a growing community of educators using video in a wide range of approaches and features some of their experiences and views through data and vignettes. In doing so this text acts as a conduit for innovative and effective video and visual media use in language teacher education.
