## Wild Life A Novel:

**Wild Life** Amanda Leduc, 2025-03-11 LONGLISTED FOR THE 2025 GILLER PRIZE Amanda Leduc's dazzling new novel follows two walking talking hyenas as they interact with humans over decades Blurring the line between human and animal these strange messengers reveal what is possible when the cages that contain us are broken In 19th century Scotland young Josiah is banished by his father for seeing the divine in the animals around him and sent to Siberia with a small Christian mission to purge such nonsense from his soul Miserably scrubbing the chapel floor one night Josiah is visited by what he thinks is God in animal form When his saviours a hyena and her mate rescue him from a natural disaster that kills the other missionaries and then bring him safely home he founds a religion based on his belief that God granted speech to the hyenas as part of a divine plan to heal and exalt the human race The hyena pair Barbara and Kendrith aren't so sure that Josiah has it right But with their beautiful strangeness they utterly transform the people they encounter over succeeding generations As Josiah's church gathers adherents more and more animals start to speak to humans from signing baby gorillas to seductive alligators At first one or two rebellious pets make a break for freedom but then comes a mass exodus of all animals held captive forcing people to contend with a wildness in themselves they have spent millennia denying The end of this remarkable fairytale is both joyful and devastating completely dissolving the boundary between what's human and what's animal

*Tit for Tat. A Novel* Mrs. M. E. Smith, 1875 *Wild Animal Story* Ralph Lutts, 2001-09-12 At the beginning of the twentieth century the wild animal story emerged in Canadian literature as a distinct genre in which animals pursue their own interests survival for themselves their offspring and perhaps a mate or the pure pleasure of their wildness Bringing together some of the most celebrated wild animal stories Ralph H Lutts places them firmly in the context of heated controversies about animal intelligence and purposeful behavior Widely regarded as entertaining and educational the early stories by Charles G D Roberts Ernest Thompson Seton John Muir Jack London and others had an avid readership among adults and children But some naturalists and at least one hunter Theodore Roosevelt discredited these writers as nature fakers accusing them of falsely portraying animal behavior The stories and commentaries collected here span the twentieth century As present day animal behaviorists psychologists and the public attempt to sort out the meaning of what animals do and our obligations to them Ralph Lutts maps some of the prominent features of our cultural landscape Tales include *The Springfield Fox* by Ernest Thompson Seton *The Sounding of the Call* by Jack London *Stickeen* by John Muir *Journey to the Sea* by Rachel Carson Other selections include essays by Theodore Roosevelt John Burroughs Margaret Atwood and Ralph H Lutts

postamble *Wildlife Films* Derek Bouse, 2000 If as many argue movies and television have become Western culture's premier storytelling media so too have they become for most members of society the primary source of encounters with the natural world particularly wild animals The television fare offered nightly by national and cable networks such as PBS and

the Discovery Channel provides millions of viewers with their only experience of the wilderness and its inhabitants. The very films that so many viewers take as accurate portrayals of wildlife however have evolved primarily as a form of entertainment following the established codes and conventions of narrative exposition. The result has been not the representation of nature but its wholesale reconstruction and reconfiguration according to film and television conventions, audience expectations and the demands of competition in the media marketplace. *Wildlife Films* traces the genealogy of the nature film from its origins as the animal locomotion studies that mark the very beginnings of motion pictures themselves to the founding of the Animal Planet cable channel that boasts all animals all the time. The narrative and thematic elements that unite wildlife films as a genre have their roots not in the documentary film tradition but in the older traditions of oral and written animal fables as reflections of human society. Bous contends that classic wildlife films often portray animal protagonists living in families modeled on an ideal of the human nuclear family and working in communities that resemble an ideal of bucolic human society. In these stories presented as documentaries animals are motivated by human emotions and conduct relationships according to human customs. This imposition of culturally satisfying narrative patterns upon the lives of animals has not only led to the misrepresentation of the natural world it has promoted the notion that our values, our moral vision, our models of society and family structure derive from nature rather than being cultural formations.

It also includes new chapters on nutritional research and field sign identification and on emerging topics including structured decision making. Finally Volume 1 addresses measurements of wildlife abundance and habitat and research on individual animals. Volume 2 begins with a section on the relationship between research and management including public outreach described in a context that encourages engagement prior to initiation of management. An adaptive management approach is described as a cornerstone of natural resource management followed by a section on managing landscapes and wildlife.

populations The volume also includes new chapters on ethics in wildlife science and conservation conflict resolution and management and land reclamation A standard text in a variety of courses the Techniques Manual as it is commonly called covers every aspect of modern wildlife management and provides practical information for applying the hundreds of methods described in its pages This deft and thorough update ensures that The Wildlife Techniques Manual will remain an indispensable resource one that professionals and students in wildlife biology conservation and management simply cannot do without Catalogue of Books in the Jamaica Plain Branch Library of the Boston Public Library Boston Public Library.
