Agriculture Committee,Griculture Committee,David Curry,2001 This Agriculture Committee report is concerned with finding answers to the technical problem of how to increase UK production of organic food to meet the existing rising demand and with the question of appropriate Government support for organic farming It is not concerned with the promotion of organic farming as a public good The report examines and makes recommendations on the expansion of organic farming and the demand for organically produced foods in the UK the supply chain and the role of supermarkets and producer owned co operatives the system for certifying organic products and for setting standards the role of Government in supporting organic farming through direct financial assistance and through indirect means such as research and development or training The Committee has reservations about the claims made for organics and recommends that that claims can be tested and verified in order that consumers really know what they are buying Clear standards are necessary The Committee regards it as critical that supermarkets which will be the main distribution channel for organic produce are involved in the design of and are encouraged to co fund future initiatives to further organic conversion The report stresses the need for organic and conventional agriculture to be interdependent it being unlikely that organic farming can ever provide the amount of food needed for the whole country The best of both techniques should be used to ensure the greatest benefits for farmers consumers and the wider community The Committee views it as essential that before determining how best to offer financial
