Skills of Workplace Communication Richard Picardi,2001-09-30 Ability and skill are important but they are not everything Equally important is how you communicate yourself your

competencies and achievements to others Teacher and consultant Richard Picardi takes a long thoughtful look at the things we all need to understand in order to allow our ideas to be heard and understood in today's noisy, hotly competitive organizations. He covers not just the skills of putting your ideas, recommendations, and analyses in writing, but also the other way in which effective communication is accomplished nonverbally. He shows you the internal and external roadblocks to effective communication and how to break through them. In Part I, Picardi analyzes the nature of verbal and nonverbal communication. He shows how to recognize and remove internal and external barriers to effective communication and create messages that get the results you want. He then focuses on the specific goals of business communication, showing how the concept of change interacts with all forms of communication, in fact, how change is implicit in them. Picardi lays out the elements of organization that are essential in creating reader-based messages, then explains how to compose the clear, forceful sentences and paragraphs to express them. Later in Part III, he presents his system of text boxes, showing how to write typical business memos and letters using direct and indirect patterns of writing to demonstrate different types of messages you want to communicate, and ends with a systematic method to revise and improve upon first drafts. He goes on to apply the principles of reader-based communication, effective organization, and clear expression to proposal and report writing. He shows how proposals differ from reports and how to write both effectively. For training and development specialists, the book provides the material you need to teach these skills to others.
