Twenty Bosses:

Bosses, Machines, and Urban Voters John M. Allswang, 2019-12-01 Originally published in 1986 Political machines and the bosses who ran them are largely a relic of the nineteenth century A prominent feature in nineteenth century urban politics political machines mobilized urban voters by providing services in exchange for voters support of a party or candidate Allswang examines four machines and five urban bosses over the course of a century He argues that efforts to extract a meaningful general theory from the American experience of political machines are difficult given the particularity of each city s history A city s composition largely determined the character of its political machines Furthermore while political machines are often regarded as nondemocratic and corrupt Allswang discusses the strengths of the urban machine approach chief among those being its ability to organize voters around specific issues

Syndicate Women Chris M. Smith, 2019-07-02 In *Syndicate Women* sociologist Chris M Smith uncovers a unique historical puzzle women composed a substantial part of Chicago organized crime in the early 1900s but during Prohibition 1920 1933 when criminal opportunities increased and crime was most profitable women were largely excluded During the Prohibition era the markets for organized crime became less territorial and less specialized and criminal organizations were restructured to require relationships with crime bosses These processes began with and reproduced gender inequality The book places organized crime within a gender based theoretical framework while assessing patterns of relationships that have implications for non criminal and more general societal issues around gender As a work of criminology that draws on both historical methods and contemporary social network analysis *Syndicate Women* centers the women who have been erased from analyses of gender and crime and breathes new life into our understanding of the gender gap
