Manfred "Dutch" von Ehrenfried

Two Moons In August:

Exploring the Martian Moons Manfred "Dutch" von Ehrenfried, 2017-04-11 This book explores the once popular idea of Flexible Path in terms of Mars a strategy that would focus on a manned orbital mission to Mars's moons rather than the more risky expensive and time consuming trip to land humans on the Martian surface While currently still not the most popular idea this mission would take advantage of the operational scientific and engineering lessons to be learned from going to Mars's moons first Unlike a trip to the planet's surface an orbital mission avoids the dangers of the deep gravity well of Mars and a very long stay on the surface This is analogous to Apollo 8 and 10 which preceded the landing on the Moon of Apollo 11 Furthermore a Mars orbital mission could be achieved at least five years possibly 10 before a landing mission Nor would an orbital mission require all of the extra vehicles equipment and supplies needed for a landing and a stay on the planet for over a year The cost difference between the two types of missions is in the order of tens of billions of dollars An orbital mission to Deimos and Phobos would provide an early opportunity to acquire scientific knowledge of the moons and Mars as well since some of the regolith is presumed to be soil ejected from Mars It may also offer the opportunity to deploy scientific instruments on the moons which would aid subsequent missions It would provide early operational experience in the Mars environment without the risk of a landing The author convincingly argues this experience would enhance the probability of a safe and successful Mars landing by NASA at a later date and lays out the best way to approach an orbital mission in great detail Combining path breaking science with achievable goals on a fast timetable this approach is the best of both worlds and our best path to reaching Mars safely in the future

Religion and Reconciliation in Greek Cities

First Contact

Kim Harrison, 2024-07-02 In the wake of the solar eclipse a portal between our world and a paranormal realm opens and a scientist's life will never be the same in this thrilling serialized adventure from the New York Times bestselling author of The Hollows Dr Renee Caisson knows there are worse things than an attractive man in uniform drafting her into a secret government project especially when Major Jackson makes it clear that he isn't bothered by her questionable past But when her labs come back with decidedly odd results the Major is forced to come clean over who the government is actually studying Renee is shocked to learn her subjects are demonic looking beings who call themselves Neighbors refugees from a dying world who arrived during the nation wide solar eclipse The Neighbors technology is unlike anything Renee's ever encountered At first she dismisses an injury that inexplicably heals as just one of those things And surely August the most gregarious Neighbor begins to speak English overnight because of the team linguist's skills Not until August begins evolving

in real time to withstand Earth's brighter dryer atmosphere does she admit that the Neighbors tech feels less like science and more like magic the same magic that brought them here in the first place and the same they're trying to rekindle with a mysterious labyrinth in order to return home and save their world At least that's what August claims they came for
