The Origins of Agnosticism Bernard Lightman,2019-12-01 Originally published in 1987 The Origins of Agnosticism provides a reinterpretation of agnosticism and its relationship to science Professor Lightman examines the epistemological basis of agnostics learned ignorance studying their core claim that God is unknowable To address this question he reconstructs the theory of knowledge posited by Thomas Henry Huxley and his network of agnostics In doing so Lightman argues that agnosticism was constructed on an epistemological foundation laid by Christian thought In addition to undermining the continuity in the intellectual history of religious thought Lightman exposes the religious origins of agnosticism **Career of Religious Ideas** Hudson Tuttle,2017-08-31 Have This Mind James E. Royster,2014-04-18 Have This Mind uses a rational logical and systematic approach to spirituality religion and God by focusing on the mind or consciousness rather than doctrine ritual etc It provides a model that resolves the many seemingly conflicting views of religion and God The four largest religions of the world Hinduism Buddhism Christianity and Islam are introduced in terms of their transformative dimensions that lead to an inclusive and eminently happy life These principles and practices are illustrated with biographies of exemplary saints and sages from the traditions Have This Mind outlines three different ways of being religious regardless of one s particular religious tradition based on a progressively maturing mind Of particular import to Christian readers are interpretations of biblical and theological views that facilitate transition from a traditional and mythic outlook tending toward exclusivism to one that is rational transrational and inclusive On the basis of an appreciative and inclusive view of the world s great religions one discovers how these religions can actually enhance one s own spirituality and religious outlook A perspective central to Have This Mind is that authentic religion and spirituality lie in the loving quality of one s life and not simply the ideas or beliefs held in one s mind Models of God and Alternative Ultimate Realities Jeanine Diller,Asa Kasher,2013-06-13 The envisioned volume is a collection of recent essays about the philosophical exploration critique and comparison of a the major philosophical models of God gods and other ultimate realities implicit in the world s philosophical schools and religions and of b the ideas of such models and doing such modeling per se The aim is

to identify exactly what a model of ultimate reality is create a comprehensive and accessible collection of extant models and determine how best philosophically to model ultimate reality if possible and desirable Religious Truth Robert Cummings Neville,2001-01-01 Explores religious truth in a range of world religions and discusses the issue and philosophical implications of comparison itself **Career of Religious Ideas** Hudson Tuttle,2018-03-25 Excerpt from Career of Religious Ideas Their Ultimate the Religion of Science A priesthood superstition bigotry persecution suppression of knowledge and the arrogance of infallibility About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works *A Doubter's Guide to World Religions* John Dickson,2022-03-15 For believers and skeptics alike A Doubter's Guide to World Religions introduces the five major world religions so that you can explore their similarities and differences in a fair and engaging way The world is a very religious place Wherever you look people are worshipping praying believing following even dying for their faith But what does it mean to be religious Are all religions the same Do they all call on the same God simply using different names Are their beliefs and practices simply cultural expressions of the same spiritual longings Written by historian and theologian John Dickson in his characteristically engaging style this book presents each of the world's five major systems of faith carefully outlining the history doctrines beliefs and spiritual practices of Hinduism The Way of Release Buddhism The Way of Enlightenment Judaism The Way of the Torah Christianity The Way of the Christ Islam The Way of Submission In his own words Dickson acts as an art curator in a gallery presenting each of these works of art in their best light and letting each have their say Along the way he demonstrates the importance of religion in general to society and to individual believers and addresses many of the universal questions that all of these serious and ancient religions ask Who are we What is our worth How should we live Are we alone At the end of each section is a bibliography of helpful books and websites for those who are interested in learning even more

Transcendentalism Kurt Kawohl,2002 One needs to keep an open mind and allow the spirit to absorb the logic of who what God is without being inhibited by what should be considered outdated religious dogma and conditioning that has been a major contributing factor to the causes of terrorism Transcendentalism can influence the beginning of a new realization in many religions If humanity would ever accept a completely logical deity called God Allah etc all borders between opposing religious factions would be eliminated and peace thereafter could be a reality Most people have their own self attained or learned knowledge or deep religious convictions on spirituality Many books have been written on various religious beliefs There are many spiritual people who know that God is the rational Purity who that does not require servitude ritualistic prayers or a forced slavery in order for the soul to be a part of Purity for eternity ALL religions have the same goal A Transcendentalist is often a spiritually enlightened individual whose ultimate goal is to unite and strengthen communities or religious organization God is the enlightenment of ALL who sincerely seek him it **A Comparison of World Religions**

Mary M. Saurer,2005-11-22 Human beings have inhabited the world for millions of years and the oldest religious art found in caves and on bones dates as far back as 30 000 years From earliest times and still today people share their ideas and form a group with others who have drawn similar conclusions about the meaning of life and the ultimate reality They might call their group a religion others might call it a cult But the name they give to their concept of God does not mean that they worship a different god only that they hold a different concept of the Source and Power of that which was is and always will be Every religion serves as a way of life an opportunity to practice ones accepted beliefs and a way to socialize with those who hold similar views Religions can be dictated but beliefs cannot They are private and unique to the individual It is ones own experience with that which he or she perceives as God that prompts the acceptance of a belief system quiet endurance when there seems to be no choice or the withdrawal from religion altogether Public and personal wars have been fought in the name of righteous indignation in support of different belief systems that came from efforts to answer the questions of life Many individuals have lived lives of frustration and confusion as a result of the commonly accepted belief system of the culture into which they were born In this study we look briefly at the historical and geographical conditions related to the emergence of specific religious views and the situation of the people whose lives are influenced by them Our intent is not to determine which religion is right or wrong Using a comparison point chart we examine the basic premises of each belief system and how the holding of a premise impacts the lives of those who live it as if it were true **Searching for Spiritual Unity . . . Can There Be Common Ground?** Robyn E. Lebron,2016-02-11 Searching for Spirituality is an introductory

The Big Questions in Science and Religion Keith Ward, 2008-05 Can religious beliefs survive in the scientific age Are they resoundingly outdated Or is there something in them of great importance even if the way they are expressed will have to change given new scientific context These questions are among those at the core of the science religion dialogue An Anglican priest who was once an atheist offers compelling insights into the often contentious relationship between diverse religious views and new scientific knowledge He identifies ten basic questions about the nature of the universe and human life Among these are Does the universe have a goal or purpose Do the laws of nature exclude miracles Can science provide a wholly naturalistic explanation for moral and religious beliefs Has science made belief in God obsolete Are there any good science based arguments for God Ward considers concepts from Buddhism Confucianism Taoism Islam Hinduism Judaism and Christianity while featuring the speculations of cosmologists physicians mathematicians and philosophers
