## **Widening Gap:**

*The Widening Gap* Jody Heymann, 2001-11-08 This hard hitting book draws on the first systematic national research on how the need to meet family obligations is affecting working Americans of all social classes and ethnic groups What happens when kids get sick When an elderly parent is hospitalized How do poor families cope with work family demands Jody Heymann s research points to a widening gap between working families and the health and development of children Outdated labor policy and practice must be brought into the twenty first century argues Heymann To do less is to abandon the precepts of equal opportunity on which America is founded

**Rising Inequality in China** Shi Li, Hiroshi Sato, Terry Sicular, 2013-10-31 This book examines the evolution of economic inequality in China from 2002 to 2007 a sequel to *Inequality and Public Policy in China* 2008

**Designing Global Economic Equality** Christian Olaf Christiansen, 2026-03-06 *Designing Global Economic Equality* is an intellectual history of global inequality a story of the rise and fall of ideas for global egalitarian politics or global equality by design Tracing the writings of United Nations thinkers and their intellectual environments it contributes to historiographies on inequality the UN development international relations theory business in society and neoliberalism Drawing on sources from development economics political science and international relations to UN reports newspaper articles management literature and interviews with contemporary UN experts it investigates how vocabularies of global inequality shifted over time The book finds that from the 1940s onward global economic inequality remained a persistent theme Global egalitarians not only championed equality norms but also concrete instruments especially development redistribution and restructuring while remaining critical of both global economic hierarchies and the belief that markets alone would ensure equality The 1970s marked the high point of efforts to design a global equality regime only to see these hopes dismantled in the early 1980s with the rise of neoliberal globalization By the late 1990s the failure of these policies paved the way for inclusive capitalism a depoliticized approach to inequality Yet global egalitarian ideas endured and the UN continued to produce inequality statistics set global norms and foster international dialogue In the wake of the 2007 2008 crises as inequality debates re emerged with force familiar themes and warnings resurfaced Offering a history of widening gaps and efforts to close them this book tells a story from which we may still learn

**China's Western Frontier and Eurasia** Zenel Garcia, 2021-09-16 China has emerged as a dominant power in Eurasian affairs that not only exercises significant political and economic power but increasingly ideational power too Since the founding of the People s Republic Chinese Communist Party leaders have sought to increase state capacity and exercise more effective control over their western frontier through a series of state building initiatives Although these initiatives have always incorporated an international component the collapse of the USSR increasing globalization and the party s professed concerns about terrorism separatism and extremism have led to a region building project in Eurasia Garcia traces how domestic elite led narratives about security and development generate state building initiatives and then region building

projects He also assesses how region building projects are promoted through narratives of the historicity of China s engagement in Eurasia the promotion of norms of non interference and appeals to mutual development Finally he traces the construction of regions through formal and informal institutions as well as integrative infrastructure By presenting three phases of Chinese domestic state building and region building from 1988 present Garcia shows how region building projects have enabled China to increase state capacity control and development in its western frontier Recommended for scholars of China s international relations and development policy
