Neutrosophic Sets and Systems, Vol. 85, 2025 Florentin Smarandache, Mohamed Abdel-Basset, Maikel Leyva Vazquez, This volume of Neutrosophic Sets and Systems is an international journal dedicated to advanced studies in neutrosophy neutrosophic sets neutrosophic logic and neutrosophic statistics The journal focuses on the philosophical concept of neutrosophy which studies the origin and scope of neutralities considering any notion along with its opposite and a spectrum of neutralities This theory generalizes classical logic and fuzzy sets by introducing a degree of indeterminacy The papers within this volume demonstrate the application of these concepts to various fields including physical education vocational college instruction brand microblog marketing green architecture and site selection for temporary shelters The research explores a range of methodologies such as multi criteria decision making MCDM fuzzy overprobability and triangular overnorms

Digitalization and Development Rajah Rasiah, Wah Yun Low, Nurliana Kamaruddin, 2023-01-31 This book examines the diffusion of digitalization and Industry 4.0 technologies in Malaysia by focusing on the ecosystem critical for its expansion The chapters examine the digital proliferation in major sectors of agriculture manufacturing e commerce and services as well as the intermediary organizations essential for the orderly performance of socioeconomic agents The book incisively reviews policy instruments critical for the effective and orderly development of the embedding

organizations and the regulatory framework needed to quicken the appropriation of socioeconomic synergies from digitalization and Industry 4.0 technologies. It highlights the importance of collaboration between government, academic, and industry partners as well as makes key recommendations on how to encourage adoption of IR4.0 technologies in the short and long term. This book bridges the concepts and applications of digitalization and Industry 4.0 and will be a must read for policy makers seeking to quicken the adoption of its technologies. The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license.

Proceedings of the 2023 3rd International Conference on Education, Information Management and Service Science (EIMSS 2023) Guiyun Guan, Christian Kahl, Bootheina Majoul, Deepanjali Mishra, 2023-10-29. This is an open access book. Amidst the advancement of modern science and technology, especially the development of information technology, our society has entered a stage of highly developed information technology. We should do our utmost to utilize the achievements yielded by scientific and technological innovation, vigorously promote the informatization of education management and provide quality services for education and teaching. The importance of information technology education in educational management simply cannot be overstated. Educational management is closely related to college education and teaching. Only through good educational management can education and teaching proceed smoothly. The realization of education management information is conducive to the propulsion of high efficiency in school management as well as to the smooth implementation of teaching objectives and better participation of students and parents in school management. Informationization is the mainstream of the world's economic development while informationization of teaching management is the product of adapting to the demand of time development. We educational management workers should learn from the excellent educational managers at home and abroad, strive to improve their information level and synchronize with the Times. In order to provide a more convenient and efficient communication platform for relevant academic researchers, we organized the 2023 3rd International Conference on Education, Information Management and Service Science (EIMSS 2023). EIMSS 2023 will be held on July 21-23, 2023 in Qingdao, China. EIMSS 2023 aims to bring together innovative academics and industrial experts in the field of Education, Information Management and Service Science to a common forum. The primary goal of the conference is to stimulate research and developmental activities in Education, Information Management and Service Science, and another goal is to facilitate the scientific exchange of information between researchers, developers, engineers, students, and practitioners working all around the world. As an ideal platform for individuals to exchange views and experiences in Education, Information Management, Service Science, and related domains, the conference will convene annually. We warmly invite you to participate in EIMSS 2023 and look forward to seeing you in Qingdao.

Lost Glory Sumit K Majumdar, 2018-07-11. *Lost Glory* India's Capitalism Story deconstructs India's industrialization story, challenging contemporary ideas about her economy.

Based on careful and detailed empirical analyses of India's industrialization for a period of almost seven decades the book provides deeply nuanced depictions of the history of political economy that have affected India's industrialization over the course of a century. These dimensions of India's economic history have never before been collated and presented. The presentation takes readers on a definitive evidence-based survey of India's industrial landscape. It includes a detailed historical description of the intellectual origins of India's modern industrialization anchored in a privileged view of economic policy making. Grounded in deep historical and political analyses that account for the variations, continuities, and changes in institutional contingencies, the facts derived on India's long-term economic performance are used to put the record straight. The findings of the book will transform debate and set the agenda for thoughtfully assessing what course the Indian economy needs to follow.

Electronic Design Automation Frameworks F. J. Rammig, Ron Waxman, 1991. During the last decade the field of electronic design automation has changed from a small industry offering a random sampling of commercial and academic design automation tools to a significant industry comprising offerings ranging from individual tools to total design systems all based upon a set of emerging standards. Workers in electronic design automation are active in the development of integrated design environments and therefore in the development of frameworks. Frameworks for electronic design automation are rather similar to those for mechanical or software engineering; however, the class of tools may differ, resulting in differing specific requirements for the services to be offered. The present book documents the results of the 2nd Workshop on electronic design automation frameworks. The question of standardization is of special interest within the book, especially as related to VHDL, EDIF, PDES, and CFI. Also included are discussions of the role of specialized languages for specific environments and how the user community can help standards to evolve.

Design and Implementation of a Web-based Student Platform Single Page Application Mohamad Aziz, 2020-08-26. Bachelor Thesis from the year 2020 in the subject Computer Science. Miscellaneous grade 89.0. Nanjing University of Science and Technology course Computer Science and Technology. language English. abstract: The main goal of this project is to create an efficient digital student platform with features where students will be able to keep track and organize their tasks and events and can also serve as a student portal in which they will be able to view their grades, taken courses, and teachers. This is done to maximize student productivity and efficiency by utilizing modern web technologies to create a web-based application that would serve this purpose. Another goal of this project is to increase practical knowledge and improve

technical expertise using modern web development tools and technologies currently used in the industry These include web frameworks such as the PHP framework Laravel and the JavaScript framework Vue js both of which will be researched and utilized in the construction of this project This objective is executed by designing and implementing the student platform web based single page application mentioned above while learning and using the modern web development tools to gain technical skills and knowledge at the same time both of which will be very valuable for years to come for future endeavors in the web development industry
