The Relación de Michoacán (1539-1541) and the Politics of Representation in Colonial Mexico Angélica Jimena Afanador-Pujol, 2015-07-01 The Relación de Michoacán 1539 1541 is one of the earliest surviving illustrated manuscripts from colonial Mexico Commissioned by the Spanish viceroy Antonio de Mendoza the Relación was produced by a Franciscan friar together with indigenous noble informants and anonymous native artists who created its forty four illustrations To this day the Relación remains the primary source for studying the pre Columbian practices and history of the people known as Tarascans or Purhépecha However much remains to be said about how the Relación's colonial setting shaped its final form By looking at the Relación in its colonial context this study reveals how it presented the indigenous collaborators a unique opportunity to shape European perceptions of them while settling conflicting agendas outshining competing ethnic groups and carving a place for themselves in the new colonial society Through archival research and careful visual analysis Angélica Afanador Pujol provides a new and fascinating account that situates the manuscript's images within the colonial conflicts that engulfed the indigenous collaborators These conflicts ranged from disputes over political posts among indigenous factions to labor and land disputes against Spanish newcomers Afanador Pujol explores how these tensions are physically expressed in the manuscript's production and in its many contradictions between text and images as well as in numerous emendations to the images By studying representations of justice landscape conquest narratives and genealogy within the Relación Afanador

Pujol clearly demonstrates the visual construction of identity its malleability and its political possibilities

Conceptualization of 'xihuitl' Mutsumi Izeki,2008 This study is concerned with how the Postclassic Mexica people developed their unique perspective of history and environment in a dynamic cultural context By focusing on the process of conceptualization of the Nahuatl word xihuitl the author analyzes the way the Mexica expressed their cognition Xihuitl covers a range of meanings turquoise grass solar year comet preciousness blue green and fire The correlations of the meanings of xihuitl can be explained from a structural point of view However structural analysis does not reveal the dynamic experiential processes that produced such correlations in the minds of the Mexica In order to account for this dynamic aspect of the concept the author employs a theory drawn from cognitive science This theory argues that the meanings and representations of a concept are metaphoric extensions that derive from the central sense of the concept Applying this theory the author examines the metaphoric extension of each xihuitl representation from the central sense The author also analyzes the four media of expression linguistic iconographic material and ritual in which representations of xihuitl occur The representations of xihuitl in each medium embody a particular aspect of the concept At the same time the concept as a whole was affected by the Mexica conceptual system the way the Mexica saw their world rooted in the connections they believed existed between themselves and those who established earlier Central Mexican civilizations
