The Computer Herman Heine Goldstine,1993

The Computer from Pascal to von Neumann Herman H.

Goldstine,2008-09-02 In 1942 Lt Herman H Goldstine a former mathematics professor was stationed at the Moore School of Electrical Engineering at the University of Pennsylvania It was there that he assisted in the creation of the ENIAC the first electronic digital computer The ENIAC was operational in 1945 but plans for a new computer were already underway The principal source of ideas for the new computer was John von Neumann who became Goldstine s chief collaborator Together they developed EDVAC successor to ENIAC After World War II at the Institute for Advanced Study they built what was to become the prototype of the present day computer Herman Goldstine writes as both historian and scientist in this first examination of the development of computing machinery from the seventeenth century through the early 1950s His personal involvement lends a special authenticity to his narrative as he sprinkles anecdotes and stories liberally through his text

The Computer and the Brain J. R. Brink,C. R. Haden,Christopher Burawa,1989 This collection of interdisciplinary analyses addresses the issue of the language of the brain The contributors include computer scientists neuroscientists psychologists linguists and historians The resulting collection reflects the state of knowledge more than a generation after John von Neumann entitled his tantalizing and provocative lectures The Computer and the Brain John von Neumann was one of the first to address the highly controversial issue of appropriate models to use in discussing cognitive science The issue he raised most pointedly and one that is still hotly debated is the language of the brain In his Silliman lectures he questioned the validity of using the computer as an interpretive model for human thought asserting that the language of the brain is not mathematical Later in the same lecture series however he attributes a statistical pattern to the brain This paradoxical stance of von Neumann s is representative of the rapidly shifting nature of cognitive science and of the study of the nature of language
