The Cosmic Connection An Extraterrestrial Perspective:

The Cosmic Connection Carl Sagan,1975 **The Cosmic Connection** Carl Sagan,1975 **Carl Sagan's Cosmic Connection** Carl Sagan,2000-08-31 A classic book by the world's most famous scientist and science visionary back in print with a new perspective **Civilized Life in the Universe** George Basalla,2006-01-19 From Plutarch and Kepler to Stephen Hawking and Carl Sagan this book offers a fascinating history of scientific speculation about life in outer space Basalla traces an unbroken but twisting chain of ideas passed from one scientist to the next and from science to popular culture He even examines the influence of popular culture on science Sagan always admitted how much Burroughs' Martian novels influenced his speculations about Mars Throughout Basalla shows that scientific belief in and search for extraterrestrial civilizations is a complex impulse part secularized religious and part anthropomorphic The Nature of Nature Bruce Gordon,William Dembski,2014-04-29 The intellectual and cultural battles now raging over theism and atheism conservatism and secular progressivism dualism and monism realism and antirealism and transcendent reality versus material reality extend even into the scientific disciplines This stunning new volume captures this titanic clash of worldviews among those who have thought most deeply about the nature of science and of the universe itself Unmatched in its breadth and scope The Nature of Nature brings together some of the most influential scientists scholars and public intellectuals including three Nobel laureates across a wide spectrum of disciplines and schools of thought Here they grapple with a perennial question that has been made all the more pressing by recent advances in the natural sciences Is the fundamental explanatory principle of the universe life and self-conscious awareness to be found in inanimate matter or immaterial mind The answers found in this book have profound implications for what it means to do science what it means to be human and what the future holds for all of us **Space, Time, and Aliens** Steven J. Dick,2020-05-11 In this comprehensive and interdisciplinary volume former NASA Chief Historian Steven Dick reflects on the exploration of space astrobiology and its implications cosmic evolution astronomical institutions discovering and classifying the cosmos and the philosophy of astronomy The unifying theme of the book is the connection between cosmos and culture or what Carl Sagan many years ago called the cosmic connection As both an astronomer and historian of science Dr Dick has been both a witness to and a participant in many of the astronomical events of the last half century This collection of papers presents his reflections over the last forty years in a way accessible to historians philosophers and scientists alike From the search for alien life to ongoing space exploration efforts readers will find this volume full of engaging topics relevant to science society and our collective future on planet Earth and beyond *Gaither's Dictionary of Scientific Quotations* Carl C. Gaither,Alma E. Cavazos-Gaither,2008-01-08 Scientists and other keen observers of the natural world sometimes make or write a statement pertaining to scientific activity that is destined to live on beyond the brief period of time for which it was intended This book serves as a collection of these statements from great philosophers and thought influencers of science past and present It allows the reader quickly to find

relevant quotations or citations Organized thematically and indexed alphabetically by author this work makes readily available an unprecedented collection of approximately 18 000 quotations related to a broad range of scientific topics
