and at 19 wrote a book on an idea that he was to make his own the habitability of other worlds There followed a career as France s greatest popularizer of astronomy with over 60 titles to his credit An admirer granted him a chateau at Juvisy sur l Orge and he set up a first rate observatory dedicated to the study of the planet Mars Finally in 1892 he published his masterpiece *La Planete Mars et ses conditions d habitabilite* a comprehensive summary of three centuries worth of literature on Mars much of it based on his own personal research into rare memoirs and archives As a history of that era it has never been surpassed and remains one of a handful of indispensable books on the red planet Sir Patrick Moore 1923 2012 needs no introduction his record of popularizing astronomy in Britain in the 20th century equaled Flammarion s in France in the 19th century Moore pounded out hundreds of books as well as served as presenter of the BBC s TV program *Sky at Night* program for 55 years a world record Though Moore always insisted that the Moon was his chef d oeuvre Mars came a close second and in 1980 he produced a typescript of Flammarion s classic Unfortunately even he found the project too daunting for his publishers and passed the torch of keeping the project alive to a friend the amateur astronomer and author William Sheehan in 1993 Widely regarded as a leading historian of the planet Mars Sheehan has not only meticulously compared and corrected Moore s manuscript against Flammarion s original so as to produce an authoritative text he has added an important introduction showing the book s significance in the history of Mars studies Here results a book that remains an invaluable resource and is also a literary tour de force in which the inimitable style of Flammarion has been rendered in the equally unique style of Moore
