Thinking And Experience

John Watson

Thinking And Experience:

The Experience of Thinking Christian Unkelbach, Rainer Greifeneder, 2013-05-07 When retrieving a quote from memory evaluating a testimony's truthfulness or deciding which products to buy people experience immediate feelings of ease or difficulty of fluency or disfluency Such experiences of thinking occur with every cognitive process including perceiving processing storing and retrieving information and they have been the defining element of a vibrant field of scientific inquiry during the last four decades This book brings together the latest research on how such experiences of thinking influence cognition and behavior The chapters present recent theoretical developments and describe the effects of these influences as well as the practical implications of this research The book includes contributions from the leading scholars in the field and provides a comprehensive survey of this expanding area This integrative overview will be invaluable to researchers teachers students and professionals in the field of social and cognitive psychology

Thinking in the World Jill Bennett, Mary Zournazi, 2019-12-26 Engaging with contemporary issues responsibly and creatively can become a very abstract activity We can sometimes find ourselves talking in terms of theories and philosophies which bear very little resemblance to how life is actually lived and experienced In *Thinking in the World* Jill Bennett and Mary Zournazi curate writings and conversations with some of the most influential thinkers in the world and ask them not just why we should engage with the world but also how we might do this Rather than simply thinking about the world the authors examine the ways in which we think in and with the world Whether it's how to be environmentally responsible how to think in film or how to dance with a non human the need to engage meaningfully in a lived way is at the forefront of this collection *Thinking in the World* showcases some of the most compelling arguments for a philosophy in action Including wholly original never before released material from Michel Serres Alphonso Lingis and Mieke Bal the different chapters in this book constitute dialogues and approachable essays as well as impassioned arguments for a particular way of approaching thinking in the world

Development and Evaluation of Recorded Programmed Experiences in Creative Thinking in the Fourth Grade Ellis Paul Torrance, Ram Gupta, 1964

Thinking and Experience Henry Habberley Price, 1953 An examination of the nature of conceptual cognition its relation to sense experience on the one hand and to symbols verbal and non verbal on the other with some discussion of the Empiricist philosophy and of the topics traditionally grouped under the name of the problem of universals Dust jacket

Phenomenology of Thinking Thiemo Breyer, Christopher Gutland, 2015-11-19 This book draws connections between recent advances in analytic philosophy of mind and insights from the rich phenomenological tradition concerning the nature of thinking By combining both analytic and continental approaches the volume arrives at a more comprehensive understanding of the mental process of thinking and the experience and manipulation of objects of thought Contributors scrutinize aspects of thinking that have a common grounding in both the phenomenological and analytic tradition perception language logic embodiment and situatedness due to individual history or current experience This collection serves to broaden

and enrich the current debate over cognitive phenomenology and lays the foundations for further dialogue between analytic and continental approaches to the phenomenal character of thinking
