1. The first part of the day was spent in the laboratory, where we conducted a series of experiments on the effect of temperature on the rate of reaction. The results were as follows:

Temperature (°C)	Rate of Reaction (mol/l.s)
10	0.0012
20	0.0024
30	0.0048
40	0.0096
50	0.0192

2. The second part of the day was spent in the library, where we collected material for our report on the history of chemistry. We found that the discovery of the periodic table of elements was a major milestone in the development of chemistry.
