Veronicas Veil:

The Legend of Veronica in Early Modern Art Katherine T. Brown, 2020-02-18 In The Legend of Veronica in Early Modern Art Katherine T Brown explores the lore of the apocryphal character of Veronica and the history of the true image relic as factors in the Franciscans placement of her character into the Via Crucis Way of the Cross as the Sixth Station in both Jerusalem and Western Europe around the turn of the fifteenth century Katherine T Brown examines how the Franciscans adopted and adapted the legend of Veronica to meet their own evangelical goals by intervening in the fabric of Jerusalem to incorporate her narrative which is not found in the Gospels into an urban path constructed for pilgrims as well as in similar participatory installations in churchyards and naves across Western Europe This book proposes plausible reasons for the subsequent proliferation of works of art depicting Veronica both within and independent of the Stations of the Cross from the early fifteenth through the mid seventeenth centuries This book will be of interest to scholars in art history theology and medieval and Renaissance studies

Time Matter(s): Invention and Re-Imagination in Built Conservation Federica Goffi, 2016-02-24 Even though the idea of altering an existing building is presently a well established practice within the context of adaptive reuse when the building in question is a mnemonic building of recognized heritage value alterations are viewed with suspicion even when change is a recognized necessity This book fills in a blind spot in current architectural theory and practice looking into a notion of conservation as a form of invention and imagination offering the reader a counter viewpoint to a predominant western understanding that preservation should be a still shot from

the past Through a micro historical study of a Renaissance concept of restoration a theoretical framework to question the issue of conservation as a creative endeavor arises It focuses on Tiberio Alfarano s 1571 ichnography of St Peter s Basilica in the Vatican into which a complex body of religious political architectural and cultural elements is woven By merging past and present temple s plans he created a track drawing questioning the design pursued after Michelangelo s death 1564 opening the gaze towards other possible future imaginings This book uncovers how the drawing was acted on by Carlo Maderno 1556 1629 who literally used it as physical substratum to for new design proposals completing the renewal of the temple in 1626 Proposing a hybrid architectural conservation approach this study shows how these two practices can be merged in contemporary renovation By creating hybrid drawings the retrospective and prospective gaze of built conservation forms a continuous and contiguous reality where a pre existent condition engages with future design rejoining multiple temporalities within continuity of identity This study might provide a paradigmatic and timely model to retune contemporary architectural sensibility when dealing with the dilemma between design and preservation when transforming a building of recognized significance

[Artistic Reconfigurations of Rome](#) Kaspar Thormod,2019-04-09 In *Artistic Reconfigurations of Rome* Kaspar Thormod examines how visions of Rome manifest themselves in artworks produced by international artists who have stayed at the city's foreign academies Structured as an alternative guide to Rome the book represents an interdisciplinary approach to creating a dynamic visual history that brings into view facets of the city's diverse contemporary character Thormod demonstrates that when artists successfully reconfigure Rome they provide us with visions that being anchored in a present undermine the connotations of permanence and immovability that cling to the Eternal City epithet Looking at the work of these artists the reader is invited to engage critically with the question what is Rome today or perhaps better what can Rome be
