Vertical Classification Barry Schwartz, Vertical Classification Barry Schwartz,1981 **Knowledge and Politics (RLE Social Theory)** Volker Meja,Nico Stehr,2014-08-13 Karl Mannheim's Ideology and Utopia has been a profoundly provocative book The debate about politics and social knowledge that was spawned by its original publication in 1929 attracted the most promising younger scholars some of whom shaped the thought of several generations The book became a focus for a debate on the methodological and epistemological problems confronting German social science More than thirty major papers were published in response to Mannheim's text Writers such as Hannah Arendt Ernst Robert Curtius Max Horkheimer Herbert Marcuse Helmuth Plessner Hans Speier and Paul Tillich were among the contributors Their positions varied from seeing in the sociology of knowledge a sophisticated reformulation of the materialist conception of history to linking its popularity to a betrayal of Marxism The English publication in 1936 defined formative issues for two generations of sociological self reflection Knowledge and Politics provides an introduction to the dispute and reproduces the leading contributions It sheds new light on one of the greatest controversies that have marked German social science in the past hundred years

Knowledge Capitalism Nico Stehr,2022-06-01 In his newest book Stehr builds on his classic book Knowledge Societies 1994 to expand the concept toward one of knowledge capitalism for a now much changed era It is not only because of the onset of the Covid 19 pandemic that we are living in a new epoch it is the idea that modern societies increasingly constitute comprehensive knowledge societies under intensive capitalism whereby the legal encoding of knowledge through national and international law is the lever that enables the transformation of the knowledge society into knowledge capitalism The Trade Related Aspects of Intellectual Property Rights agreement negotiated between 1986 and 1994 as part of the World Trade Organization is the backbone of the modern society and marks a clear historical demarcation

and although knowledge capitalism is primarily an economic development the digital giants who are in the driver's seat have significant effects on the social structure and culture of modern society *Sociology* ,1982 **The Elusive Executive** Gary King,Lyn Ragsdale,1988 *International Journal of the Sociology of Language* ,1985 *Cultural Boundaries of Science* Thomas F. Gieryn,1999-01-15 Why is science so credible Usual answers center on scientists objective methods or their powerful instruments In his new book Thomas Gieryn argues that a better explanation for the cultural authority of science lies downstream when scientific claims leave laboratories and enter courtrooms boardrooms and living rooms On such occasions we use maps to decide who to believe cultural maps demarcating science from pseudoscience ideology faith or nonsense Gieryn looks at episodes of boundary work Was phrenology good science How about cold fusion Is social science really scientific Is organic farming After centuries of disputes like these Gieryn finds no stable criteria that absolutely distinguish science from non science Science remains a pliable cultural space flexibly reshaped to claim credibility for some beliefs while denying it to others In a timely epilogue Gieryn finds this same controversy at the heart of the raging science wars *Paperbound Books in Print* ,1992 **Sociological Abstracts** Leo P. Chall,1983 *Humboldt Journal of Social Relations* ,1996 **Sociological Analysis** ,1983 **A World Imagined** Neeraj Prakash,1999 **How Classification Works** Nelson Goodman,Mary Douglas,David L. Hull,1992 How Classification Works attempts to bridge the gap between philosophy and the social sciences using as a focus some of the work of Nelson Goodman Throughout his long career Goodman has addressed the question are some ways of conceptualizing more natural than others This book looks at the rightness of categories assessing Goodman's role in modern philosophy and explaining some of his ideas on the relation between aesthetics and cognitive theory Two papers by Nelson Goodman are included in the collection and there are analyses of his work by seven leading academics in anthropology philosophy sociology and musicology *Encyclopedia of Sociology: Japa-publ* ,2000 *Semiotica* ,1998 *Symbolic Interactionism: Contemporary issues* Kenneth Plummer,1991
