**Digital Future** John Case, 1985 A Discussion of the History Technology Possible Future of Computers

**The Personal Computer Past, Present and Future 1975/2021** Peter Farwell, 2021-08-31 This book relates the story of the Personal Computer from 1975 to 2021 It discusses the spectacular growth in sales over the first 36 years to 2011 and the techniques used by entrepreneurs to make this happen The next six years to 2017 are years of precipitous decline in Personal computer sales We explain the causes of this decline We conclude by an examination of PC sales to 2021 when they enjoyed a resurgence and speculate on why this has been happening

[Theoretical Physics on the Personal Computer](#) Erich W. Schmid, Gerhard Spitz, Wolfgang Lösch, 2012-12-06 We would like to thank Mr A H Armstrong who translated this book for his many valuable suggestions and corrections We also acknowledge a stimulating response from our readers Mr J Peeck sent us a diskette containing the programs modified to run on an ATARI computer Mr H U Zimmermann sent us diskettes on which the graphics software of the book is adapted to the requirements of the FORTRAN 77 compiler by MICROSOFT Readers interested in these adaptations should contact the authors Tiibingen January 1988 E W Schmid G Spitz v Preface to the German Edition This book is based on the lecture course Computer applications in Theoretical Physics which has been offered at the University of Tiibingen since 1979 This course had as its original aim the preparation of students for a numerical diploma course in theoretical physics It soon became clear however that the course provides a valuable supplement to the fundamental lectures in theoretical physics Whereas teaching in this field had previously been principally characterised by the derivation of equations it is now possible to give deeper understanding by means of application examples A graphical presentation of numerical results proves to be important in emphasizing the physics Interaction with the machine is also valuable At the end of each calculation the computer should ask the question Repeat the calculation with new data yes no The student can then answer yes and input the new data e.g Floppy disk supplementary electronic material no longer available
