The Community Builders:

The Community Builders Handbook Urban Land Institute. Community Builders' Council,1947 **Affordable Housing and Upward Mobility** Daniel Aziz Yadegar,Massachusetts Institute of Technology. Department of Urban Studies and Planning,2012 An increasing austerity at all levels of government has propelled a heightened focus on more efficient models of housing delivery human service delivery and community development One area of increased attention with minimal empirical research remains the integration of these three arenas While the integration of such fields has been proposed conceptually for at least twenty years there is little record of the challenges faced through integration or the proven benefits of such a model This thesis looks at the integration of property management wraparound services and community building as implemented across three sites by the renowned nonprofit housing developer The Community Builders Inc The process of integration known as Ways Means remains in its nascent stages programmatic goals remain undefined making it difficult to provide a complete evaluation What this thesis offers instead however is a formative evaluation in which stakeholders reflect upon Ways Means as it has evolved thus far and recommendations for the initiative s improvement Three pressing challenges are given central focus namely 1 defining overall programmatic goals 2 restructuring the organization to facilitate the integration of Ways Means and 3 establishing an evaluative capacity for outcomes of the Ways Means initiative While this thesis was not sponsored or endorsed by Community Builders research was conducted in close collaboration with senior leadership of the organization Extensive interviewing offers a look at integration challenges from multiple perspectives an overview potentially useful to other nonprofits or government entities interested in pursuing a similar endeavor **The Community Builders Handbook** Urban Land Institute. Politics Virginie Mamadouh,2017-05-15 Depending on the breadth or narrowness of the understanding of politics and the political politics in human geography is defined as either the operation of power in all social relations or the workings of power directed to or by the state This volume avoids the two extremes by acknowledging the transformation of approaches to the political in human geography over the past few decades but also by highlighting the continued importance of the more traditional state based conception of politics The selected articles are clustered around six themes new agendas in political geography state territoriality international relations and globalization internal territorial organisation and geographical scale social movements and electoral participation and identities and citizenship
