## **The Coventry Option:**

The Coventry Option Anthony Burton, 1979      Geometry and Atmosphere C. Alan Short, Peter Barrett, Alistair Fair, Monty Sutrisna, 2016-12-05 Drawing on detailed design construction and financial histories of six prominent Performing Arts buildings with budgets ranging from 3 4 million to over 100 million Geometry and Atmosphere presents unique and valuable insights into the complex process of building for the arts Each theatre project from tailor made spaces for avant garde companies to iconic and innovative receiving houses yields surprising and counter intuitive findings For each of the six projects the authors have interviewed all those involved Combining these interviews with exhaustive archival research the authors then provide cross case analysis which is distilled into guidance for all stakeholders as they transform their initial vision into built reality In particular the book challenges the technical focus of existing design guides for the Performing Arts by suggesting that current practice in briefing and design does not serve the Arts community especially well It shows that there is a need for an approach in which the focus is firmly rooted in the delivery of the driving artistic vision As well as being of interest to architects urban designers and those involved in theatre studies this book will be useful to other sectors where public money is spent on major building projects      **Local Government and Strategic Choice (Routledge**

**Revivals)** John Friend, Neil Jessop, 2013-10-14 First published in 1969 this book is concerned with the processes of policy making in local government The authors address themselves to the basic challenge of planning in a democracy and consider issues such as how those elected to exercise choice on our behalf can preserve and expand their capacity to choose discriminatingly when the sheer complexity of the issues facing them tends all the time to make them increasingly dependent on the skills and judgements of their professional advisers This question is explored in relation to the many different yet interdependent aspects of the planning process which impinge on any local community with particular reference to the planning of housing transport education and shopping of land use and local government finance The book is the outcome of a four year program of research during which a mixed team of operational research and social scientists was given a unique opportunity to observe the ways in which decisions were made and plans formulated in one particular city Coventry It covers both political and professional aspects of local government in 1960s Great Britain and has had important implications for urban governments throughout the world      Local Government and Strategic Choice J.K. Friend, W.N. Jessop, 2016-08-03

Local Government and Strategic Choice Second Edition is the result of a study of policy formation in the City Council of Coventry during a four year period This edition is a reappraisal of the earlier edition with an emphasis on connective planning Part I describes the planning strategies made in an urban setting This part explains the City and the City Council organization of the local authority decision making mechanisms developmental planning including land use school system planning and cross departmental planning Part II is a study of city planning as a process of strategic choice that has been altered in many different ways depending on the purpose This part also discusses the problems encountered in the planning

process such as the existence of organization boundaries in the government sector Part III deals with a fictional case that relates the uncertainties and political realities of decision making in an urban setting The case studies cover land allocation and development tax and traffic issues Part IV discusses organizational challenge and also touches in some way on the future organizational structure of local governments This text then explains the need for connective planning of how individuals build flexible networks among decision making agencies to serve the various interests of both the private and government sectors This book is suitable for sociologists city administrators and officials local government officials heads of government agencies and heads of planning and engineering departments of local government units **Option** ,1997 **History of the**
