**Thinking Ecologically, Thinking Responsibly** Nancy Arden McHugh, Andrea Doucet, 2021-12-01 Thinking Ecologically Thinking Responsibly brings together a transdisciplinary cohort of feminist critical race Indigenous and decolonial scholars who build upon and seek to widen and deepen the legacy and potential of feminist philosopher Lorraine Code's work Since the publication of her 1987 book *Epistemic Responsibility* Code has been at the forefront of linking epistemologies ontologies ethics and epistemic injustice to guide critical frameworks for responsible situated knowing and practices This volume both enacts and expands Code's theories epistemologies and practices It points to how concepts such as epistemic responsibility and approaches like ecological thinking are not only theoretical frameworks for knowing the world well they are also practices and approaches that more and more feminists and critical thinkers are embodying in their work in order to think write and live critically and responsibly

**Thinking Ecologically** Marian Chertow, 1997-01-01 Twenty five years ago the Cuyahoga River in Ohio was so contaminated that it caught fire air pollution in some cities was thick enough to taste and environmental laws focused on the obvious enemy large American factories with belching smokestacks and pipes gushing wastes Federal legislation has succeeded in providing cleaner air and water but we now confront a different set of environmental problems less visible and more subtle This important book offers thought provoking ideas on how America can respond to changing public health and ecological risks and create sound environmental policy for the future The innovative thinkers of the Next Generation Project of the Yale Center for Environmental Law and Policy experts from business government nongovernmental organizations and academia propose reforms that balance environmental efforts with other public needs and issues They call for new foundations for environmental law and policy adoption of a more diverse set of policy tools and strategies economic incentives ecolabels and new connections between critical sectors agriculture energy transportation service providers and environmental policy Future progress must involve not only officials from the U S Environmental Protection Agency and state environmental protection departments say the authors but also decision makers as diverse as mayors farmers energy company executives and delivery route planners To be effective next generation policy making will view environmental challenges comprehensively connect academic theory with practical policy and bridge the gaps that have caused recent policy debates to break down in rancor This book begins the process of accomplishing these challenging goals

**Thinking Ecologically in Educational Policy and Research** Sarah Winchell Lenhoff, Jeremy Singer, Michael Gottfried, 2024-02-29 This book places a focus on educational ecosystems that is understanding the complex nature of educational experiences and promoting a coordinated set of policy and practice solutions to address interrelated problems that manifest in school and student outcomes Educational policy and politics have been dominated by school improvement initiatives that locate educational problems and solutions in schools themselves rather than in the systemic and structural roots of those problems segregation poverty and histories of compounding inequality Youth outcomes that we

associate with schools e.g. achievement, attendance, graduation are the consequences of systemic structural and environmental factors that interact with the lived experiences of students in their communities and schools. This insightful volume provides examples of how to understand and analyse educational issues ecologically and evidence on the opportunities and challenges with forging cross sector partnerships to address educational issues ecologically. **Thinking Ecologically in Educational Policy and Research** will be a key resource for practitioners and researchers of education leadership and policy, educational administration, educational research, educational studies and sociology. This book was originally published as a special issue of the Peabody Journal of Education.

**Thinking Ecologically** Bruce Morito, 2002. Arguments about the environment in the history of Western thought accompany a guide to developing an approach to environmental thought based on ecological attunement. In this analysis of the fundamental concepts that ground environmental policy, Sustainability, sustainable development and conservation are three concepts that illustrate the relationship between humans and the environment. A synthesis of Western, Eastern and Aboriginal approaches to the environment offers a radically new way of thinking about how environmental ethics develop and evolve.

The Ecological Thought Timothy Morton, 2010-04-15. The author argues that all forms of life are interconnected and that no being, construct or object can exist independently from the ecological entanglement, nor does nature exist as an entity separate from the uglier or more synthetic elements of life. Realizing this interconnectedness is what the author calls the ecological thought. He investigates the philosophical, political and aesthetic implications of this interconnectedness.

**Thinking Ecologically about the Global Political Economy** Ryan Katz-Rosene, Matthew Paterson, 2019-12-20. This book advances an ecologically grounded approach to International Political Economy (IPE). Katz, Rosene and Paterson address a lacuna in the literature by exploring the question of how thinking ecologically transforms our understanding of what IPE is and should be. The volume shows the ways in which socio-ecological processes are integral to the themes treated by students and scholars of IPE: trade, finance, production, interstate competition, globalisation, inequalities and the governance of all these, notably and further that taking the ecological dimensions of these processes seriously transforms our understanding of them. Global capitalism has always been premised on the extraction, transformation and movement of what have become known as natural resources. The authors provide a synthesis of ecological arguments regarding IPE and weave them into an overall approach to be usable by others in the field. This synthesis draws on basic ecological, political ideas such as limits to growth and environmental justice ideas in ecological economics, practices of ecological movements in the global economy as well as key ideas from other political economic traditions relevant for developing an ecological approach. Providing a broad and critical introduction to international political economy from a distinctly ecological perspective, this work will be a valuable resource for students and scholars alike.

*Ecological Thinking* Lorraine Code, 2006-04-27. How could ecological thinking animate an epistemology capable of addressing feminist, multicultural and other post-colonial concerns? Starting from an epistemological approach

implicit in Rachel Carson's scientific practice Lorraine Code elaborates the creative restructuring resources of ecology for a theory of knowledge She critiques the instrumental rationality abstract individualism and exploitation of people and places that western epistemologies of mastery have legitimated to propose a politics of epistemic location sensitive to the interplay of particularity and diversity and focused on responsible epistemic practice Drawing on ecological theory and practice on naturalized epistemology and on feminist and post colonial theories Code analyzes extended examples from developmental psychology and from two natural institutions of knowledge production medicine and law These institutions lend themselves well to a reconfigured naturalism They are in practice empirically scientifically informed specifically situated and locally interpretive With human subjects as their objects of knowledge they invoke the responsibility requirements central to Code's larger project This book discusses a wide range of literature in philosophy social science and ethico political thought Highly innovative it will generate productive conversations in feminist theory and in the ethics and politics of knowledge more broadly conceived [Forum for Applied Research and Public Policy](#) ,1999
