Truth And Truthmakers:

Truth and Truthmakers D. M. Armstrong, 2004-05-27 This book first published in 2004 makes a compelling case for truthmaking and its importance in philosophy

Truth and Truthmakers David Malet Armstrong, 2004 Truths are determined not by what we believe but by the way the world is Or so realists about truth believe Philosophers call such theories correspondence theories of truth Truthmaking theory which now has many adherents among contemporary philosophers is the most recent development of a realist theory of truth and in this book D M Armstrong offers the first full length study of this theory He examines its applications to different sorts of truth including contingent truths modal truths truths about the past and the future and mathematical truths In a clear even handed and non technical discussion he makes a compelling case for truthmaking and its importance in philosophy His book marks a significant contribution to the debate and will be of interest to a wide range of readers working in analytical philosophy

Metaphysics and Truthmakers Jean-Maurice Monnoyer, 2013-05-02 The essays collected in this volume concern the general question of truthmaking Most of them also bear upon the metaphysical nature of truthmakers moments tropes property instances Aristotelian substances states of affairs meanings or essences Taking as their starting point a famous seminal paper by K Mulligan P Simons and B Smith as well as D Armstrong s outstanding contribution to the subject they offer a fresh assay of the main concepts involved in order to assess the explanatory value of truthmakers and truthmaker necessitarianism and explore such delicate issues as contingent truth bare possibility tensed propositions the ontological irreducibility of relations the subsistence of facts and the epistemic role of negative truths The collection as a whole provides a comprehensive and thought provoking survey of the current debate about truthmaking theory and deserves to be read carefully by anyone interested in the relationship between language thought and reality With contributions from David ARMSTRONG Stefano CAPUTO Fran ois CLEMENTZ Pascal ENGEL Herbert HOCHBERG Philipp KELLER Jonathan LOWE Jean Maurice MONNOYER Kevin MULLIGAN Stephen MUMFORD Frederic NEF Peter SIMONS Barry SMITH Jonathan SIMON

Truth and Social Reality Aaron M. Griffith, 2025-06-05 Truth and Social Reality A Metaphysical Inquiry presents a new theory of social truth and social construction The book weds truthmaker theory with recent work in social ontology arguing that social truths are true in virtue of socially constructed portions of the world It focuses on the construction of human social kinds like gender race class and disability The book offers novel accounts of social construction realism social kind pluralism social context the context dependency of social truth and social vagueness Overall Truth and Social Reality presents a realist picture of the social world on which there are objective truths about the way things are in the social world Social truth is not socially constructed despite being grounded in a socially constructed reality The theory it provides nonetheless captures the contingency alterability and vagueness of the social world and the context dependency of social truth The book also addresses the relationships between truth power and justice It argues that truth itself is not a tool of oppression as some maintain Rather

truth and truth telling play an essential role in upending oppression and achieving justice Truth and Social Reality rebuts the cynicism of the post truth age by defending the possibility and value of social truth Truth and Truth-making E. J. Lowe,A. Rami,2014-12-05 Truth depends in some sense on reality But it is a rather delicate matter to spell this intuition out in a plausible and precise way According to the theory of truth making this intuition implies that either every truth or at least every truth of a certain class of truths has a so called truth maker an entity whose existence accounts for truth This book aims to provide several ways of assessing the correctness of this controversial claim This book presents a detailed introduction to the theory of truth making which outlines truth maker relations the ontological category of truth making entities and the scope of a truth maker theory The essays brought together here represent the most important articles on truth making in the last three decades as well as new essays by leading researchers in the field of the theory of truth and of truth making

Truth and Ontology Trenton Merricks,2007-04-19 That there are no white ravens is true because there are no white ravens And so there is a sense in which that truth depends on the world But this sort of dependence is trivial After all it does not imply that there is anything that is that truth s truthmaker Nor does it imply that something exists to which that truth corresponds Nor does it imply that there are properties whose exemplification grounds that truth Trenton Merricks explores whether and how truth depends substantively on the world or on things or on being And he takes a careful look at philosophical debates concerning among other things modality time and dispositions He looks at these debates because any account of truth s substantive dependence on being has implications for them And these debates likewise have implications for how and whether truth depends on being Along the way Merricks makes a number of new points about each of these debates that are of independent interest of interest apart from the question of truth s dependence on being Truth and Ontology concludes that some truths do not depend on being in any substantive way at all One result of this conclusion is that it is a mistake to oppose a philosophical theory merely because it violates truth s alleged substantive dependence on being Another result is that the correspondence theory of truth is false and more generally that truth itself is not a relation of any sort between truth bearers and that which makes them true

Truthmakers Helen Beebe,Julian Dodd,2010 The concept of truthmaking is attracting much attention in contemporary metaphysics This work asks how the truthmaker principle should be formulated whether it is well motivated whether it genuinely has the explanatory roles claimed for it and whether more modest principles might serve just as well

An Identity Theory of Truth J. Dodd,2016-04-30 This book argues that correspondence theories of truth fail because the relation which holds between a true thought and a fact is that of identity not correspondence According to Julian Dodd facts are not complexes of worldly entities they are as Frege believed true thoughts The supposed truthmaker is nothing but the truthbearer The author christens this response to correspondence theories the modest identity theory which he goes on to distinguish from those identity theories propounded at some time or other by Russell Moore Bradley John McDowell and Jennifer Hornsby It is acknowledged that the modest identity theory

provides neither a definition of truth nor an account of what truth consists in The modest identity theory's role is by contrast that of diagnosing the failure of correspondence theories and thereby preparing the ground for a proper deflation of the concept of truth a deflation defended in the latter part of the book

A Theory of Truthmaking Jamin Asay, 2020-04-30 Demonstrates how truthmaking can be used to make progress all across philosophy but without its usual theoretical baggage

Truthmaking Jamin Asay, 2023-02-02 Truthmaking is the metaphysical exploration of the idea that what is true depends upon what exists Truthmaker theorists argue about what the truthmaking relation involves which truths require truthmakers and what those truthmakers are This Element covers the dominant views on these core issues in truthmaking It also explores some key metaphysical topics and debates that are usefully approached by employing the tools of truthmaker theory the debate between presentists and eternalists over the existence of entities from the past and the debate between actualists and possibilists over merely possible states of affairs In the final section the Element explores how to think about truthmakers for truths involving social constructions

Minimal Truth Ryan Christensen, 2008

Truth and Truthmaking in 17th-century Scholasticism Brian Embry, 2015 Some propositions are true and others are false What explains this difference Some philosophers have recently defended the view that a proposition is true because there is an entity its truthmaker that makes it true Call this the truthmaker principle The truthmaker principle is controversial occasioning the rise of a large contemporary debate about the nature of truthmaking and truthmakers What has gone largely unnoticed is that scholastics of the early modern period also had the notion of a truthmaker *verificativum* and this notion is at the center of early modern scholastic disputes about the ontological status of negative entities the past and future and uninstantiated essences My project is to explain how early modern scholastics conceive of truthmaking and to show how they use the notion of a truthmaker to regiment ontological enquiry I argue that the notion of a truthmaker is born of a certain conception of truth according to which truth is a mereological sum of a true mental sentence and its intentional object This view entails the truthmaker principle and is responsible for some surprising metaphysical views For example it leads many early modern scholastics to posit irreducible negative entities as truthmakers for negative truths giving rise to an extensive literature on the nature of negative entities In order to find truthmakers for the so called eternal truths such as A human being is an animal some philosophers claim that individual essences distinct from and independent of God necessarily have being from eternity Other early modern scholastics reject these extravagant views

they argue that only positive present tense truths are made true by existing things This view is motivated jointly by i a distinctive theory of truth bearers ii a common sense view of the truth conditions for negative tensed and modal truths and iii the idea that truths are about their truthmakers I argue that this view has significant philosophical consequences and should be attractive to those who think both that truth is grounded in being and that not every truth has a truthmaker

Logique et analyse ,2007 **Mind** ,2003 Issues for 1896 1900 contain papers of the Aristotelian Society *Swedish journal of philosophy* ,2005 A Swedish journal of philosophy **Revista Veritas** ,2005 **Monism** Andreas Bächli,2003 As the editors are quick to point out monism is not a particular theory or even a unique school of thought However monistic intuitions or doctrines are grounded in many different ways of philosophizing For instance one may argue that there is ultimately only one thing or one kind of thing or that there is only one set of true beliefs one truth one type of action one sort of meaning one way of analyzing explaining and understanding or alternatively one may pursue the project of the unity of knowledge or even that of the unity of science Taken in this broad sense monism is often opposed to varieties of pluralism or numerous versions of dualism since so much philosophical debate has focused on the question whether there are two different kinds of thing mind and matter or only one This volume aims to discuss some of these aspects historically and systematically In doing so it sheds light on larger issues of unity and diversity integration and polarity fusion and separation Since pluralism and multiculturalism are clearly on the intellectual agenda this is a welcome much needed contribution to concept clarification The editors have wisely chosen to present issues related to monism as an ongoing aspect in the history of philosophy There are sprightly contributions that are noteworthy for literary grace as well as epistemological insight Included are essays on monism in pre Socratic philosophy Democritus on the distinction between universals and particulars Parmenides and Hegel on monism monism and dualism in Nietzsche's Birth of Tragedy the unity of truth mindless monism minimalist monism and a deft essay on why it is hard to be a monist if one wants to be a phenomenologist

Truth and Its Deformities Peter A. French,Howard K. Wettstein,2008-09-23 Truth and Its Deformities is the 32nd volume in the Midwest Studies in Philosophy series It contains major new contributions on a range of topics related to the general theme of the volume by some of the most important philosophers writing on truth in recent years It is an international collection of contributors working on such topics as Truth and Meaning Evidence and Testimony Bullshit Truth and Paradox and Pointless Truth The list of contributors includes Scott Soames Susan Haack Kieran Setiya Tim Mauldin Max Kolbel Marian David and Paul Horwich In the tradition of Midwest Studies in Philosophy this volume should set the terms of the debate on these topics for philosophers for some time to come
