The Natural Alien Humankind And Environment:

The Natural Alien Lorne Leslie Neil Evernden, 1993-01-01 In this eloquent and sympathetic book Evernden evaluates the international environmental movement and the underlying assumptions that could doom it to failure Beginning with a simple definition of environmentalists as those who confess a concern for the non human he reviews what is inherent in industrial societies to make them so resistant to the concerns of environmentalists His analysis draws on citing such diverse sources as Merleau Ponty Heidegger and TIME and examines how we tend to think about the world and how we might think about it The book does not offer solutions to environmental questions but it does offer the hope that there can be new ways of thinking and flexibility in human environmental relations Although humans seem alienated from our the natural world we can develop a new understanding of self in the world The second edition has a new preface and an epilogue in which Evernden analyses the latest environmental catch phrase sustainable development

Identity and the Natural Environment Susan Clayton, 2003-11-07 The often impassioned nature of environmental conflicts can be attributed to the fact that they are bound up with our sense of personal and social identity Environmental identity how we orient ourselves to the natural world leads us to personalize abstract global issues and take action or not according to our sense of who we are We may know about the greenhouse effect but can we give up our SUV for a more fuel efficient car Understanding this psychological connection can lead to more effective pro environmental policymaking Identity and the Natural Environment examines the ways in which our sense of who we are affects our relationship with nature and vice versa This book brings together cutting edge work on the topic of identity and the environment sampling the variety and energy of this emerging field but also placing it within a descriptive framework These theory based empirical studies locate environmental identity on a continuum of social influence and the book is divided into three sections reflecting minimal moderate or strong social influence Throughout the contributors focus on the interplay between social and environmental forces as one local activist says We don t know if we re organizing communities to plant trees or planting trees to organize communities
