Using Data To Make Better Educational Decisions:

   Using Data to Make Better Educational Decisions Philip Streifer,2002-02-11 Most of the business world has been using what is known as data driven decision making for quite some time now From retail to medicine to travel the ability to access data from any point and crosscheck it is commonplace except in the educational sector Striefer builds a case arguing that the correct use of data and the relationship between different types of data can be used to help answer the most complex questions in education today This process of analyzing evidence can help school administrators go to the public with the best and most accurate information they can quickly bring together   **Handbook of Data-Based Decision Making in Education** Theodore Kowalski,Thomas J. Lasley,2010-04-15 Education has fought long and hard to gain acceptance as a profession and since professionals by definition use data to shape the decisions they make education has little choice but to continue moving in this direction This 3 part handbook represents a major contribution to the literature of education It is a unique compendium of the most original work currently available on how when and why evidence should be used to ground practice It is a comprehensive cross disciplinary research based and practice based resource that all educators can turn to as a guide to data based decision making The Handbook of Data Based Decision Making in Education is a must read for researchers who are just beginning to explore the scientifically based nature of educational practice It is also appropriate for policy makers and practitioners who are confronted with young people who need to be in classrooms where best practices are the norm and not the exception   Tools and Techniques for Effective Data-driven Decision Making Philip Alan Streifer,2004 With the new federal law No Child Left Behind there is ever increasing pressure on schools to be accountable for improving student achievement That pressure is taking the form of focused efforts around data driven decision making However very little is known about what data driven decision making can really tell one about improving achievement nor is there a full explanation available about what it really takes to do this work The few examples that do exist while proposing to get at some of these issues make huge assumptions about educators knowledge base and available resources necessary for success In this book Philip Streifer fills the gaps by laying out how this work can be done and then explains what is knowable when one actually conducts these analyses and what follow up steps are needed to make true improvements He provides readers with a comprehensive understanding of what data driven decision making can and cannot tell educators about student achievement and addresses the related issues for leadership policy development and accountability Senior level district administration for policy development school level administrators who have to put policy into practice and graduate college professors teaching data driven decision making will find this book most useful   *Transforming Data Into Knowledge* Jeffrey C. Wayman,2024-08-30 This Special Issue includes works on linking data and learning using student assessment results data mining data decision making for teachers identifying student s needs with technology and data use in urban high schools The goals of the Journal of Education for Students Placed At Risk JESPAR are to provide the best
