the World of Ideas Matthew David,Debora Halbert,2015-08-17 Formally ownership of ideas is legally impossible and can never be globally secured Yet in very real and significant ways these limits have been undone In principle ideas cannot be owned yet undoing the distinction between ideas and tangible manifestations the distinction which underpins the principle allows the principle to hold even whilst its meaning is hollowed out Post Cold War global network capitalism is premised upon regulatory structures designed to enforce deregulation in global markets and production but at the same time to enforce global regulation of property and intellectual property in particular However this roll out has not been without resistance and limitations Globalization the affordances of digital networks and contradiction within capitalism itself between private property and free markets promote and undo global IP expansion In this book David and Halbert map the rise of global IP protectionism debunk the key justifications given for IPRs dismiss the arguments put forward for global extension and harmonization and suggest that roll back suspension and even simply the bi passing of IP in practice offer better solutions for promoting innovation and meeting human needs **A World of Ideas** Chris Rohmann,2000-10-31
