Clemens Wendtner

Worldwide Asset And Liability Modeling:

Worldwide Asset and Liability Modeling William T. Ziemba, John M. Mulvey, 1998-11-12 The underlying theme of this volume is how to invest assets over time to achieve satisfactory returns subject to uncertainties various constraints and liability commitments Most investors be they individuals or institutions do not diversify properly across markets nor across time The papers utilize several approaches and integrate a number of techniques as well as discussing a variety of models that have either been implemented are close to being implemented or represent new innovative approaches that may lead to future novel applications Other issues address the future of asset liability management modeling This includes models for individuals and various financial institutions such as banks and insurance companies This will lead to custom products that is financial engineering All in all this will be essential reading for all involved in analysing the financial markets

Quantitative Fund Management M.A.H. Dempster, Gautam Mitra, Georg Pflug, 2008-12-22 The First Collection That Covers This Field at the Dynamic Strategic and One Period Tactical Levels Addressing the imbalance between research and practice Quantitative Fund Management presents leading edge theory and methods along with their application in practical problems encountered in the fund management industry A Current Snapshot of State of the Art Applications of Dynamic Stochastic Optimization Techniques to Long Term Financial Planning The first part of the book initially looks at how the quantitative techniques of the equity industry are shifting from basic Markowitz mean variance portfolio optimization to risk management and trading applications This section also explores novel aspects of lifetime individual consumption investment problems fixed mix portfolio rebalancing allocation strategies debt management for funding mortgages and national debt and guaranteed return fund construction Up to Date Overview of Tactical Financial Planning and Risk Management The second section covers nontrivial computational approaches to tactical fund management This part focuses on portfolio construction and risk management at the individual security or fund manager level over the period up to the next portfolio rebalance It discusses non Gaussian returns new risk return tradeoffs and the robustness of benchmarks and portfolio decisions The Future Use of Quantitative Techniques in Fund Management With contributions from well known academics and practitioners this volume will undoubtedly foster the recognition and wider acceptance of stochastic optimization techniques in financial practice

Handbook of the Fundamentals of Financial Decision Making Leonard C. MacLean, William T. Ziemba, 2013 This handbook in two parts covers key topics of the theory of financial decision making Some of the papers discuss real applications or case studies as well There are a number of new papers that have never been published before especially in Part II Part I is concerned with Decision Making Under Uncertainty This includes subsections on Arbitrage Utility Theory Risk Aversion and Static Portfolio Theory and Stochastic Dominance Part II is concerned with Dynamic Modeling that is the transition for static decision making to multiperiod decision making The analysis starts with Risk Measures and then discusses Dynamic Portfolio Theory Tactical Asset Allocation and Asset Liability Management Using

Utility and Goal Based Consumption Investment Decision Models A comprehensive set of problems both computational and review and mind expanding with many unsolved problems are in an accompanying problems book The handbook plus the book of problems form a very strong set of materials for PhD and Masters courses both as the main or as supplementary text in finance theory financial decision making and portfolio theory For researchers it is a valuable resource being an up to date treatment of topics in the classic books on these topics by Johnathan Ingersoll in 1988 and William Ziemba and Raymond Vickson in 1975 updated 2 nd edition published in 2006

Handbook of Heavy Tailed Distributions in Finance S.T Rachev,2003-03-05 The Handbooks in Finance are intended to be a definitive source for comprehensive and accessible information in the field of finance Each individual volume in the series should present an accurate self contained survey of a sub field of finance suitable for use by finance and economics professors and lecturers professional researchers graduate students and as a teaching supplement The goal is to have a broad group of outstanding volumes in various areas of finance The Handbook of Heavy Tailed Distributions in Finance is the first handbook to be published in this series This volume presents current research focusing on heavy tailed distributions in finance The contributions cover methodological issues i e probabilistic statistical and econometric modelling under non Gaussian assumptions as well as the applications of the stable and other non Gaussian models in finance and risk management
