Supervision Jeffrey Glanz, Sally J. Zepeda, 2015-10-30 Supervision New Perspectives for Theory and Practice co edited by two prominent scholars in the field Jeffrey Glanz and Sally Zepeda draws attention to supervision as a function that is often misunderstood under appreciated and frequently controversial Much has changed in the last two decades in the education world These changes have inevitably influenced the theory and practice of supervision This text includes some of the top scholars in the field in the USA to offer their insights to important topics and issues in supervision To strike a balance the editors also included award winning practitioners who share their insights about supervision We hope that this volume raises awareness to several critical issues that affect teachers administrators and policy makers With the range of topics associated with supervision we believe that the authors offer an informed and lively discussion of supervision in the present and future contexts of schools Through our efforts we believe that the multiple contexts in which supervision unfolds are examined alongside trends including high stakes testing the uses of data the work superintendents do to supervise principals and the type of supervision that builds a just and caring school culture that is culturally relevant and respectful for teachers and leaders *Routledge Handbook of Integrated Project Delivery* Derek Walker, Steve Rowlinson, 2019-07-26 The concept of integrated project delivery IPD has evolved as a result of the need for highly expert teams of people to collaborate to deliver extremely complex projects to manage expectations about delivery speed changes in governance standards and to take advantage of and manage expectations raised by rapid advances in technology All this demands effective change management This is the first Handbook to contextualise and thematically explore the concept with an emphasis on rigorous practical and theoretical validation The Handbook is divided into five sections each with a focus on several interconnected themes including An introduction to IPD concepts The foundational elements and characteristics of IPD People culture and collaboration as key ingredients to successful and effective IPD Technology and process aspects of relational contracting forms such as IPD New and relevant perspectives to IPD that have received scant attention to date Aspects and emerging issues that are rarely consciously considered in traditional project delivery due to the commercial imperative that drives firms and client organisations The Handbook offers both discussions of these key themes and also in depth research into construction and other industry project procurement and delivery that spans decades In addition the Handbook presents best and better practice but also includes insights into cutting edge experimental developments in technology and practices where proof of concept is currently being developed into emerging practice Contributing authors in this Handbook collaborate with the co editors to draw together an integrated set of chapters

that align to deliver a coherent narrative of the IPD concept It is an invaluable reference for practitioners and academics alike and useful as core course content for numerous degree programs of study and professional development courses
