Fortnight , 1949 *Drowning by Accident* Elizabeth Meinhard, 2022-02-15 Drowning By Accident explains why it is so easy to drown where accidents happen and how to save lives by early rescue and resuscitation More than 600 people die by drowning in Britain every year Swimming is promoted as a particularly safe form of exercise so that swimmers forget or ignore the dangers of frigid lakes swollen rivers incoming tides or outgoing rip currents Drowning accidents take place because we don t recognise water as a hostile environment We overestimate the strength and endurance of our bodies and underestimate the power and deceptiveness of water Year after year victims lose their lives in typical drowning accidents often sinking so quickly and silently that nearby family friends and onlookers fail to notice the tragedy taking place close beside them Babies drown in baths Toddlers drown in garden ponds School children fall off rafts Teenagers strike too far from the shore Pensioners wade into rivers to save their dogs Victims often die within minutes of sinking beneath the surface A quarter of those who reach hospital alive will also die while others survive with severe permanent brain damage This

means that it is vitally important for parents grandparents teachers lifeguards and lawmakers to recognise the risks and prevent drowning accidents before they take place Records & Briefs New York State Appellate Division , **Industrial Sports Journal** ,1950 **Ceylon Journal of Science** ,1922 Spokesman of the Carriage and Associate Trades ,1911 Western Construction News ,1928 Western Construction ,1928 **Industrial Medicine Desk Reference** David F.
