risk mainly in the area of the parents mental health but also in other related psychosocial circumstances that may impair parental functioning These include migration substance abuse and infant hospitalisation Throughout this book the authors examine the effects of adverse life circumstances on infant and family and in most cases also describe assessments and interventions Several chapters have been written by people personally affected by mental illness or mental illness of a family member This provides in depth and often poignant understanding of the perspective of those living with the effects of such illnesses and helps to expand our knowledge and skills to work with at risk families **Skull-face** Robert E.
