The Polluters:

The Polluters Benjamin Ross, Steven Amter, 2010-09-02 The chemical pollution that irrevocably damages today's environment is although many would like us to believe otherwise the legacy of conscious choices made long ago During the years before and just after World War II discoveries like leaded gasoline and DDT came to market creating new hazards even as the expansion and mechanization of industry exacerbated old ones Dangers still felt today smog pesticides lead chromium chlorinated solvents asbestos even global warming were already recognized by chemists engineers doctors and business managers of that era A few courageous individuals spoke out without compromise but still more ignored scientific truth in pursuit of money and prestige The Polluters reveals at last the crucial decisions that allowed environmental issues to be trumped by political agendas It spotlights the leaders of the chemical industry and describes how they applied their economic and political power to prevent the creation of an effective system of environmental regulation Research was slanted unwelcome discoveries were suppressed and friendly experts were placed in positions of influence as science was subverted to serve the interests of business The story of The Polluters is one that needs to be told an unflinching depiction of the onslaught of chemical pollution and the chemical industry's unwillingness to face up to its devastating effects

The Polluters Benjamin Ross, 2010 Benjamin Ross and Steven Amter here tell the story of how the chemical industry abetted by a compliant government set loose a plague of pollution that began in the years before and directly following World War II a plague that still lingers today The advent of new synthetic chemical products such as Nylon and DDT created new hazards just as the expansion and mechanization of industry exacerbated old ones Environmental dangers well known today smog pesticides lead chlorinated solvents asbestos and even global warming were already recognized in that era by chemists engineers doctor

The Polluters: Industry Or Government? Neil Herman Jacoby, F. G. Pennance, 1972 *Climate Justice through the Polluter-Pays Principle* Patrick Kimuyu, 2018-02-28 Polemic Paper from the year 2018 in the subject Politics

Environmental Policy grade 13 Egerton University language English abstract It is evident that the environment is experiencing immense consequences from the impact of pollution One of the most challenging issues related to the degradation of the environment owing to pollution is the phenomenon of climate change Climate change explains the adverse effects of environmental degradation and pollution is the principal cause of this life threatening phenomenon Despite the remarkable progress achieved in combating environmental pollution through environmental policy approaches there is a need for climate justice in which the polluter will be held responsible for the damage caused to the environment In theory this is the approach of the so called Polluter Pays Principle This approach appears relevant in addressing issues related to

environmentally mediated to humans Despite the endless debate on issues of morality and justice especially in America the tenets of climate justice should be upheld by enforcing environmental policies that require the polluter to pay Therefore this argumentative essay will present an array of aspects that explain why the polluter should pay It will discuss property rights economic efficiency tradable permits and provide the means on how polluters can pay
