**Using MATLAB in the Classroom**, 1993      **Creative Ways of Knowing in Engineering** Diana Bairaktarova, Michele Eodice, 2016-12-29 This book offers a platform for engineering educators who are interested in implementing a creative ways of knowing approach to presenting engineering concepts The case studies in this book reveal how students learn through creative engagement that includes not only design and build activities but also creative presentations of learning such as composing songs writing poems and short stories painting and drawing as well as designing animations and comics Any engineering educator will find common ground with the authors who are all experienced engineering and liberal arts professors who have taken the step to include creative activities and outlets for students learning engineering

*Proceedings of 20th Iberian Conference on Information Systems and Technologies (CISTI 2025)* Alvaro Rocha, Francisco García Peñalvo, Carlos J. Costa, Ramiro Gonçalves, 2026-01-01 This book comprises peer reviewed papers selected for presentation and discussion at the 20th Iberian Conference on Information Systems and Technologies CISTI 2025 held from June 16 to 19 2025 at ISEG Lisbon School of Economics and Management University of Lisbon Portugal CISTI 2025 is a leading international forum that brings together researchers practitioners and industry experts to exchange the latest research findings innovative solutions emerging trends professional experiences and key challenges across various domains of information systems and technologies The conference also emphasizes recent technological advancements and their practical applications The book covers essential topics such as A organizational models and information systems B knowledge management and decision support systems C software systems architectures applications and tools D computer networks mobility and pervasive systems E human centered computing F health informatics G information technologies in education and H architecture and engineering of construction The primary audience for this publication includes postgraduate students researchers and academics in information systems and technologies It also serves as an essential reference for

undergraduate students and professionals in related fields      **Teaching Electromagnetics** Krishnasamy T. Selvan, Karl F. Warnick, 2021-06-17 Teaching Electromagnetics Innovative Approaches and Pedagogical Strategies is a guide for educators addressing course content and pedagogical methods primarily at the undergraduate level in electromagnetic theory and its applications Topics include teaching methods lab experiences and hands on learning and course structures that help teachers respond effectively to trends in learning styles and evolving engineering curricula The book grapples with issues related to the recent worldwide shift to remote teaching Each chapter begins with a high level consideration of the topic reviews previous work and publications and gives the reader a broad picture of the topic before delving into details Chapters include specific guidance for those who want to implement the methods and assessment results and evaluation of the effectiveness of the methods Respecting the limited time available to the average teacher to try new methods the chapters focus on why an instructor should adopt the methods proposed in it Topics include virtual laboratories computer assisted learning and

MATLAB tools The authors also review flipped classrooms and online teaching methods that support remote teaching and learning The end result should be an impact on the reader represented by improvements to his or her practical teaching methods and curricular approach to electromagnetics education The book is intended for electrical engineering professors students lab instructors and practicing engineers with an interest in teaching and learning In summary this book Surveys methods and tools for teaching the foundations of wireless communications and electromagnetic theory Presents practical experience and best practices for topical coverage course sequencing and content Covers virtual laboratories computer assisted learning and MATLAB tools Reviews flipped classroom and online teaching methods that support remote teaching and learning Helps instructors in RF systems field theory and wireless communications bring their teaching practice up to date Dr Krishnasamy T Selvan is Professor in the Department of Electronics Communication Engineering SSN College of Engineering since June 2012 Dr Karl F Warnick is Professor in the Department of Electrical and Computer Engineering at BYU Mathematics for Social Justice Catherine A. Buell, Bonnie Shulman, 2021-11-17 Mathematics instructors are always looking for ways to engage students in meaningful and authentic tasks that utilize mathematics At the same time it is crucial for a democratic society to have a citizenry who can critically discriminate between fake and reliable news reports involving numeracy and apply numerical literacy to local and global issues This book contains examples of topics linking math and social justice and addresses both goals There is a broad range of mathematics used including statistical methods modeling calculus and basic algebra The range of social issues is also diverse including racial injustice mass incarceration income inequality and environmental justice There are lesson plans appropriate in many contexts service learning courses quantitative literacy reasoning courses introductory courses and classes for math majors What makes this book unique and timely is that the most previous curricula linking math and social justice have been treated from a humanist perspective This book is written by mathematicians for mathematics students Admittedly it can be intimidating for instructors trained in quantitative methods to venture into the arena of social dilemmas This volume provides encouragement support and a treasure trove of ideas to get you started The chapters in this book were originally published as a special issue of the journal PRIMUS Problems Resources and Issues in Mathematics Undergraduate Studies **Syllabus**, 1996 **Proceedings of the 2022 3rd International Conference on Artificial Intelligence and Education (IC-ICAIE 2022)** Bob Fox, Chuan Zhao, Marcus T.
