Utility Of Force:

The Utility of Force Rupert Smith, 2008-02-12 From a highly decorated general a brilliant new way of understanding war and its role in the twenty first century Drawing on his vast experience as a commander during the first Gulf War and in Bosnia Kosovo and Northern Ireland General Rupert Smith gives us a probing analysis of modern war He demonstrates why today s conflicts must be understood as intertwined political and military events and makes clear why the current model of total war has failed in Iraq Afghanistan and other recent campaigns Smith offers a compelling contemporary vision for how to secure our world and the consequences of ignoring the new shifting face of war

Modern War and the Utility of Force Isabelle Duyvesteyn, Jan Angstrom, 2010-04-05 This book investigates the use and utility of military force in modern war After the Cold War Western armed forces have increasingly been called upon to intervene in internal conflicts in the former Third World These forces have been called upon to carry out missions that they traditionally have not been trained and equipped for in environments that they often have not been prepared for A number of these new types of operations in allegedly new wars stand out such as peace enforcement state building counter insurgency humanitarian aid and not the least counter terrorism The success rate of these missions has however been mixed providing fuel for an increasingly loud debate on the utility of force in modern war This edited volume poses as its central question what is in fact the utility of force Is force useful for anything other than a complete conventional defeat of a regular opponent who is confronted in the open field This book

will be of much interest to students of strategic studies war and conflict studies counter insurgency security studies and IR Isabelle Duyvesteyn is an Associate Professor at the Department of History of International Relations Utrecht University in the Netherlands Jan Angstrom is a researcher at the Swedish National Defence College Deliberation on Utility of Force in the Twenty-first Century Robert S. White, 2016 Despite tactical dominance and technical battlespace awareness the United States is not achieving the results its overwhelming military capabilities seem to promise This is indicative of a failure in operational art caused by a misapplication of force and misunderstanding its utility when used for purposes not intended and ultimately ill suited The utility of force resides in its ability to achieve to the appropriate degree regarding the amount of force required and utilized a military objective aligned to and nested within the greater political goal To better engage today's adversaries our strategic leaders and military practitioners need to embrace a new paradigm regarding applications of military force as they formulate strategies plan campaigns and conduct operations in pursuit of national interests By challenging the underlying assumptions regarding the utility of force our leaders can properly address the current cycles of confrontation and conflict Ultimately other instruments of national power must be relied upon and bolstered where necessary The use of force can create at best a stalemate Other levers of national power must be applied to achieve the desired endstate or policy objective
